ACCOUNTING 9706/31

Paper 3 Structured Questions

October/November 2019

MARK SCHEME
Maximum Mark: 150

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of 18 printed pages.

[Turn over

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

© UCLES 2019 Page 2 of 18

October/November 2019

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

3(b)(iii)	Price earnings ratio earnings per share = $\frac{204000}{1000000}$	= 0.204			
	PER = $\frac{2.50 (1)}{0.204 (1)}$ = 12.25 (1)OF				

© UCLES 2019 Page 9 of 18

Question	Answer	Marks
3(c)	Possible answers:	8
	J plc has a dividend cover of 4.53 times which compares the amount of profit earned by the ordinary shareholder with the amount of dividend held. This is reasonable (1) and indicates that the company will be able to continue to pay the current level of ordinary dividends even if profits fall. (1)	
	Max 2	
	The gearing ratio is 18.63% which is the relationship between fixed cost capital and total capital. In this case J plc has low gearing which means that the company has a low borrowing as a proportion of its total capital and long term finance (1). J plc is a low risk company (1) with interest having a smaller effect on the amount of profit available for ordinary shareholders. (1)	
	Max 2	
	The price earnings ratio is 12.25 which compares the market price of the shares with the earnings per share. This means that it takes 12.25 years to recover the market price of the shares with earnings. (1) Buyers of shares are paying 12.25 times the earnings to acquire shares in J plc. (1) This indicates expected future growth. (1)	
	Max 2	
	The current ratio is 1.75 : 1 which means that the business is liquid (1) having \$1.75 of short term current assets to every \$1 of short term current liabilities. (1) The business is therefore able to pay its short term debts with its inventory, trade receivables and cash and cash equivalents. (1)	
	Max 2	
	Accept other valid points.
