Paper 5 Planning, Analysis and Evaluation

October/November 2017

MARK SCHEME

Maximum Mark: 30

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

© IGCSE is a registered trademark.

This document consists of **8** printed pages.

Mark scheme abbreviations

;	separates marking points
/	alternative answers for the same point
R	reject
A	accept (for answers correctly cued by the question, or by extra guidance)
AW	alternative wording (where responses vary more than usual)
underline	actual word given must be used by candidate (grammatical variants accepted)
max	indicates the maximum number of marks that can be given
ora	or reverse argument
mp	marking point (with relevant number)
ecf	error carried forward
I	ignore
AVP	alternative valid point

Question	Answer	Marks
1(a)(i)	weigh / measure (out) / take / put / add / use/ AW, 6 (.01) g urea ; add 500 cm ³ (distilled / deionised) water (and stir until dissolved) ;	2
1(a)(ii)	<i>idea of</i> removing (a known and) same volume of urea solution (with second dilution taken from first dilution, etc.) at each stage of dilution ; <i>idea of</i> adding (a known and) same volume of (distilled) water at each stage of dilution ; A as a diagram showing sequence of dilution A as a table showing volumes (and concentrations) A proportional dilution for max 1 (ecf) if 4 dilutions correctly gained	2
1(b)(i)	<i>independent</i> temperature ; <i>dependent</i> conductivity (of enzyme and substrate / ions / solution) ; A in conductivity units	2
1(b)(ii)	substituting, the active enzyme / urease, by an unreactive substance (at all temperatures) A e.g. boiled or denatured enzyme / water in place of enzyme / 0.0M enzyme / (solution of) urea without urease or substituting, urea / substrate, with water ; I 'use (distilled) water' unqualified A e.g. water in place of substrate / 0.0M substrate / (solution of) urease without urea	1

Question	Answer	Marks
1(b)(iii)	<p><i>max 5 if mp7 not given</i></p> <p><i>any 6 from:</i></p> <p>1 <i>ref. to a suitable range of at least 5 temperatures ; A any 5 in the range 10–70 °C</i></p> <p>2 <i>ref. to using suitable apparatus (to incubate enzyme and urea solutions at constant temperature(s)) ; e.g. (thermostatically controlled) water baths / incubators / thermostatically or temperature controlled room / (magnetic stirrer) hotplate</i> A beaker plus hot water as water-bath I air conditioning</p> <p>3 <i>ref. to using same volume of urease each time ; total volume must not exceed 30 cm³</i></p> <p>4 <i>ref. to using same volume of (each) urea concentration ; total volume must not exceed 30 cm³</i></p> <p>5 <i>ref. to using (same volume of) buffer to maintain a constant pH ; A use buffer to control pH</i></p> <p><i>procedure:</i></p> <p>6 <i>ref. to incubating urease and urea concentrations separately ;</i></p> <p>7 <i>ref. to mixing urea and urease solutions (on the magnetic stirrer) and immersing (conductivity) probe ; I 'probe is used' unqualified</i></p> <p>8 <i>ref. to taking reading (from meter) at same time (for each solution / temperature) ; A any stated time from 0 s to 5 min</i> A take reading immediately / AW A 'use meter to measure rate of reaction' if time context correct</p> <p>9 <i>ref. to testing each of the concentrations (of urea) at each temperature ;</i></p> <p>10 <i>ref. to a min. of 3 replicates / repeats and a mean / find anomalies ;</i></p>	6

Question	Answer	Marks
1(b)(iii)	11 <i>ref. to suitable hazard and precaution ;</i> A low risk experiment I medium risk experiment R no risk / high risk A urease / enzyme is allergen or irritant and wear gloves / goggles A Ammonia (given off at high temperature) is irritant / mask or gloves	
1(c)(i)	1 one curve drawn correctly ; <i>does not need to go through origin</i> A straight line up then level without curving 2 V_{\max} shown ;  3 $\frac{1}{2}V_{\max}$ shown ; 4 K_m shown ; A Michaelis-Menten (constant)	4
1(c)(ii)	1 D ; 2 (temperature showing) lowest K_m or shows, greater / greatest / higher / highest, affinity (of the, enzyme / urease) for its substrate / AW ;	2

Question	Answer	Marks
2(a)(i)	<p><i>any 1 from:</i></p> <ol style="list-style-type: none"> 1 time of soaking (grain in the salt solutions) / 12 hours soaking for each set / AW ; 2 number of grains (soaked in each, salt concentration / set / covered petri dish) ; 3 temperature (of germination / incubation) ; <i>20 °C if quoted</i> 4 time intervals of recording (germination) ; A recorded at 8 hour intervals or recorded over 5 days 5 <i>idea of</i> taking a standard appearance of grain when judged to be germinated ; e.g. <i>emergence of radicle</i> 	1
2(a)(ii)	<p><i>any 1 from:</i></p> <ol style="list-style-type: none"> 1 volume of (salt) solution used, on the filter paper / in the (Petri) dish ; I 'amount' unqualified 2 age of grain ; 3 (use) undamaged / not infected / not diseased / AW, grain ; I size / mass, of grain 4 <i>idea of</i> light (exposure of grains during germination / breaking dormancy) ; 5 supply of, air / oxygen (to the grain) ; 6 <i>idea of</i> spacing of grains ; 7 pH (of solution) ; 	1

Question	Answer				Marks																																																
2(b)(i)	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th data-bbox="692 217 985 432" rowspan="3">concentration of salt solution / mmoldm⁻³</th> <th colspan="4" data-bbox="985 217 1583 331">mean (cumulative) percentage of grains that had germinated each day</th> </tr> <tr> <th colspan="2" data-bbox="985 331 1274 383">1</th> <th colspan="2" data-bbox="1274 331 1583 383">5</th> </tr> <tr> <th data-bbox="985 383 1131 432">X</th> <th data-bbox="1131 383 1274 432">Y</th> <th data-bbox="1274 383 1420 432">X</th> <th data-bbox="1420 383 1583 432">Y</th> </tr> </thead> <tbody> <tr> <td data-bbox="692 432 985 483">0</td> <td data-bbox="985 432 1131 483">93.8</td> <td data-bbox="1131 432 1274 483">92.0</td> <td data-bbox="1274 432 1420 483">98.0</td> <td data-bbox="1420 432 1583 483">97.0</td> </tr> <tr> <td data-bbox="692 483 985 534">10</td> <td data-bbox="985 483 1131 534">93.0</td> <td data-bbox="1131 483 1274 534">90.2</td> <td data-bbox="1274 483 1420 534">97.4</td> <td data-bbox="1420 483 1583 534">96.4</td> </tr> <tr> <td data-bbox="692 534 985 585">20</td> <td data-bbox="985 534 1131 585">92.2</td> <td data-bbox="1131 534 1274 585">87.0 ;</td> <td data-bbox="1274 534 1420 585">96.6</td> <td data-bbox="1420 534 1583 585">93.6</td> </tr> <tr> <td data-bbox="692 585 985 636">30</td> <td data-bbox="985 585 1131 636">96.4 ;</td> <td data-bbox="1131 585 1274 636">90.0</td> <td data-bbox="1274 585 1420 636">96.4</td> <td data-bbox="1420 585 1583 636">93.0</td> </tr> <tr> <td data-bbox="692 636 985 687">40</td> <td data-bbox="985 636 1131 687">92.0</td> <td data-bbox="1131 636 1274 687">90.4</td> <td data-bbox="1274 636 1420 687">95.4</td> <td data-bbox="1420 636 1583 687">92.4</td> </tr> <tr> <td data-bbox="692 687 985 738">50</td> <td data-bbox="985 687 1131 738">91.3</td> <td data-bbox="1131 687 1274 738">91.0</td> <td data-bbox="1274 687 1420 738">95.0</td> <td data-bbox="1420 687 1583 738">91.6</td> </tr> <tr> <td data-bbox="692 738 985 790">60</td> <td data-bbox="985 738 1131 790">91.2</td> <td data-bbox="1131 738 1274 790">90.0</td> <td data-bbox="1274 738 1420 790">95.0</td> <td data-bbox="1420 738 1583 790">91.0</td> </tr> </tbody> </table>				concentration of salt solution / mmoldm ⁻³	mean (cumulative) percentage of grains that had germinated each day				1		5		X	Y	X	Y	0	93.8	92.0	98.0	97.0	10	93.0	90.2	97.4	96.4	20	92.2	87.0 ;	96.6	93.6	30	96.4 ;	90.0	96.4	93.0	40	92.0	90.4	95.4	92.4	50	91.3	91.0	95.0	91.6	60	91.2	90.0	95.0	91.0	2
