Paper 3 Case Study MARK SCHEME Maximum Mark: 100 9609/32 May/June 2022

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2022 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **25** printed pages.

# Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

# Social Science-Specific Marking Principles (for point-based marking)

1	Co •	mponents using point-based marking: Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.
	Fro	om this it follows that we:
	a b	DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term) DO credit alternative answers/examples which are not written in the mark scheme if they
	c	are correct DO credit answers where candidates give more than one correct answer in one
	d	prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require <i>n</i> reasons (e.g. State two reasons). DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
	From the a DO cor b DO are c DO pro ans d DO (Cr e DO pos f DO cre sta g DO syll with e Sla • Ser • Col ma indi	DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
	f	DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
	g	DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)
2	Pre	esentation of mark scheme:
	•	Slashes (/) or the word 'or' separate alternative ways of making the same point. Semi colons (;) bullet points (•) or figures in brackets (1) separate different points. Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).
3	Ca	Iculation questions:
	•	The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
	•	If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
	•	Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
	•	Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

# 4 Annotation:

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

# PREPARATION FOR MARKING

- 1 Make sure that you have completed the relevant training and have access to the *RM Assessor Guide*.
- 2 Make sure that you have read and understand the question paper, which you can download from <a href="https://support.rm.com/ca">https://support.rm.com/ca</a>
- 3 Log in to RM Assessor then mark and submit the required number of practice and standardisation scripts. You will need to mark the standardisation scripts to the required accuracy in order to be approved for marking live scripts. You may be asked to re-mark them, or to mark a second sample, if you do not meet the required accuracy on your first attempt.

### MARKING PROCESS

- 1 Mark strictly to the FINAL mark scheme, applying the criteria consistently and the general marking principles outlined on the previous page.
- 2 If you are in doubt about applying the mark scheme, consult your Team Leader.
- 3 Mark at a steady rate through the marking period. Do not rush, and do not leave too much until the end. If you anticipate a problem in meeting the deadline, contact your Team Leader immediately and the Examiners' Helpdesk.
- 4 Examiners will prepare a brief report on the performance of candidates to send to their Team Leader via email by the end of the marking period. The Examiner should note strengths seen in answers and common errors or weaknesses. Constructive comments on the question paper, mark scheme or procedures are also appreciated.

# MARKING SPECIFICS

#### Crossed out work

- 1 <u>All</u> of a candidate's answers, *crossed out* or not, *optional* or not, <u>must</u> be marked.
- 2 The only response not to be marked is one that has been crossed out and <u>replaced</u> by another response for that <u>exact same</u> question.
- 3 Consequently, if a candidate has crossed out their response to an <u>optional</u> question and gone on to answer a <u>different</u> optional question then <u>both</u> attempts must be marked. The higher mark will be awarded by the system according to the rubric.

# 0 (zero) marks or NR (no response)

- 1 Award **NR** if there is <u>nothing</u> at all written in answer to that question (often the case for optional questions).
- 2 Award **NR** if there is a <u>comment which is not an attempt</u> at the question (e.g. 'can't do it' or 'don't know' etc.)
- 3 Award NR if there is a <u>symbol</u> which is <u>not an attempt</u> at the question, such as a dash or question mark.
- 4 Award **0** (zero) if there is any <u>attempt</u> at the question which <u>does not score marks</u>. This includes copying the question onto an Answer Booklet.

#### Annotation

- 1 Every <u>question</u> must have <u>at least one</u> annotation e.g. <NAQ> if it is an NR and <X> or <seen> if 0 marks are awarded.
- 2 Every <u>page</u> of a script must have <u>at least one</u> annotation e.g. <BP> for a blank page.

# Paper 3 Specific Marking Guidance

- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Handwriting and use of English language are not to be assessed.
- A response consisting of a list should be assessed. It is unlikely that such a response will score highly in the levels in each Assessment Objective.
- If a response does not fit in the space provided it should be assessed as if it did whether it is shorted, or longer and a continuation sheet is used.
- The main RM Assessor annotations to be used are K (Knowledge), APP (Application), AN (Analysis), EVAL (Evaluation).
- For each of these four annotations, the number of marks awarded must match the number of times that annotation is on the response.
- Only award EVAL if the candidate has also demonstrated APP.
- Application marks are not awarded for repeating material from the case study. Application is achieved by answering in the context of the case or by using the information in the case to help answer the question.
- In Section B, candidates answer either **Question 6** or **Question 7**. The Section B question that the candidate does not answer must be entered as 'no response'.

This mark scheme includes a summary of appropriate content for answering each question. It should be emphasised, however, that this material is for illustrative purposes and is not intended to provide a definitive guide to acceptable answers. It is quite possible that among the scripts there will be some candidate answers that are not covered directly by the content of this mark scheme. In such cases, professional judgement should be exercised in assessing the merits of the answer and the senior examiners should be consulted if further guidance is required.

Application marks are not awarded for repeating material from the case study. Application is by answering in the context of the case or by using the information in the case to help answer the question.

Question	Answer	Marks
1	<ul> <li>Analysis Building chains of arguments linked to Knowledge and Application points raised above. <ul> <li>Knowledge of workforce can be linked to find solutions to the problems faced at the Hydrocamel factory. This could result in an increase in productivity which would reduce unit costs of production. <li>Employees may be motivated by the increased responsibility (Herzberg) associated with Kaizen resulting in a reduction in labour turnover and a reduction in recruitment costs. Therefore, profits would increase.</li> <li>A reduction in faulty products would cut costs and ensure customers are satisfied leading to higher sales. <li>Increased responsibility at work will enhance employee satisfaction and may result in lower rates of absenteeism. Therefore, there will be an increase in output and less disruption to production and less pressure on other employees due to absences. <li>Kaizen empowers workers and results in the quick introduction of new ideas and motivates employees to come up with more ideas.</li> </li></li></li></ul></li></ul>	

Question	Answer	Marks
2(a)	Refer to lines 71–74. Calculate the:	
2(a)(i)	cross elasticity of demand of the Hydrocamel following the price reduction of the Hippo Barrel	2
	XED = % change in quantity of good A / % change in price of good B (1 mark if no relevant calculation)	
	XED = -8 / -20 (1) allow 8 / 20 (1)	
	XED = 0.4 (2)	
	Other answers –0.4 (1)	

Question	Answer			Marks			
2(a)(ii)	annual revenue of the Hydrocamel if its price is reduced by 10%.						
	Rationale	Content	Marks				
	Correct answer with or without units. Working not required.	\$5 644 800	5				
	Correct working for calculating revenue. Correct Qd $\times$ correct price.	44 800 × 126	4				
	New quantity demanded following price change	44 800	2				
	Percentage change in demand following price change	12(%)	1				
	Price after 10% reduction OR relevant formula(e)	(\$)126	1				
	Relevant formulae if no relevant calculation	PED <b>OR</b> Revenue	1 max				
	No creditable content		0				
	Content Revenue = price × quantity (1 mark if no relevant cal PED = % change quantity / % change price Or % change in quantity = PED × % change in price calculation)	·	elevant				
	New price is: 140 – 10% = (\$)126 (1)						
	% change in quantity given that PED = $-1.2$ is:						
	-1.2 × -10 = 12% (1)						
	new quantity = 40 000 × 1.12 = 44 800 (2)						
	revenue = 44 800 × 126 (4)						
	= \$5 644 800 OR 5 644 800 (5)						
	126 × 40 000 = (\$)5 040 000 (3)						
	126 × 50 000 = (\$)6 300 000 (3)						
	Answer based on 126 × by any quantity = (3) [on bas quantity correctly was awarded 2 marks] <b>OFR</b>	sis that calcula	ting				

Question			Ans	wer		Marks		
2(b)	You may refer to your answer to 2(a) and other information. Evaluate the usefulness to WTZ of elasticity data when planning its marketing strategy.							
2(0)	Level	Knowledge 2 marks	Application 2 marks	Analysis 4 marks	Evaluation 4 marks			
	2	2 marks Two or more relevant points	2 marks Two points applied WTZ	3–4 marks Good use of theory and/or reasoned argument to answer question	3–4 marks Good judgement shown e.g. well supported conclusion			
	1	1 mark One relevant point made	1 mark One point applied WTZ	1–2 marks Some use of theory and/or reasoned argument to answer question	1–2 marks Some judgement shown e.g. one factor very important			
	<ul> <li>Elas of its</li> <li>–</li> <li>–</li> <li>Defi</li> </ul>	s determinants. PED measures XED measures product. PrED measure spending. nition of marke	s responsivene s responsivene responsivenes ting strategy: co	eness of Qd or Qs t ss of Qd to change ss of Qd to change ss of Qd to change pordinated marketir s and marketing bu	in price. in price of another in promotional ng mix to achieve			
				s and marketing bu	aget.			
	<ul> <li>Application</li> <li>Competition from Hippo Barrel which is \$20 cheaper than the Hydrocamel.</li> </ul>							
	price	9		stic –1.2 i.e. sensiti	C C			
	• Use _ _	of answer to C Revenue witho	2(a) (OFR) out price reducti venue of \$44 80	.4 (i.e. goods are si ion would be \$5.6m 0.				
	<ul> <li>Pror \$10</li> </ul>	notional elastic 000.	ity linked to cha	be elastic/respons anging current pron				

Question	Answer	Marks
2(b)	<ul> <li>Analysis</li> <li>Reducing price will result in an increase in quantity demanded if estimate of PED is correct and therefore revenue will increase.</li> <li>PED suggests that, other things being equal, a decrease in price will result in a marginal increase in revenue. This can be used to help make pricing decisions as it will help to demonstrate whether profit will also increase.</li> <li>XED indicates that demand for Hydrocamel is not sensitive to change in price of competitor product, so WTZ has some control over pricing.</li> <li>PrED is elastic, therefore an increase in revenue, suggesting that greater advertising is worthwhile.</li> <li>20.83% reduction in price is required to achieve sales of 50 000 units, assuming that PED is -1.2</li> <li>19.2% increase in promotion could raise sales to 50 000 units assuming PrED is 1.3. This would only be an extra \$1923 of promotional spending.</li> </ul>	
	<ul> <li>Evaluation Only award EVAL if the candidate has also demonstrated APP. </li> <li>Judgement of the usefulness of elasticity to marketing planning.</li> <li>Elements that the evaluation/judgement might depend on: <ul> <li>Decisions of competitors will affect the impact of any price change made by WTZ.</li> <li>Accuracy of the elasticity estimates.</li> </ul> </li> <li>Significance of other factors that may also influence the marketing strategy such as operations and human resource.</li> <li>Marketing strategy depends on effective market research to identify needs of customers and determine how best to appeal to them.</li> </ul>

# Cambridge International AS & A Level – Mark Scheme **PUBLISHED**

Question	Answer	Marks
4(a)	Refer to Table 1 and Table 2. Calculate for 2022 the:	
4(a)(i)	gearing ratio	3
	Non-current liabilities / (Shareholder Equity + NCL) $\times$ 100	
	OR	
	Debt / (Debt + equity) × 100	
	OR	
	Long term liabilities / capital employed $\times$ 100 (1 mark if no relevant calculation)	
	Capital employed = Shareholder equity + NCL = 4 + 4 +14 = (\$)22(m) (1)	
	Gearing = 14 / 22 × 100 (2)	
	Gearing = 63.6% OR 63.6 OR 64 (allow 63) (3)	
	If wrong year: 2021 = 56.2% OR 56.2 OR 56 (2)	
	OR Long term liabilities / equity $\times$ 100 (1 mark if no relevant calculation) (Accept equivalent variations of this equation) Gearing = 14 / 8 $\times$ 100 (2)	
	Gearing = 175% OR 175 (3)	
	If wrong year: 2021 = 128% OR 128 (2)	
	Other likely answers 14 / 18 × 100 = 77.7 OR 77.8 OR 78 (%) (2)	
	Answer based on 14 / any number $\times$ 100 e.g.14 / 28 $\times$ 100 = 50 (2) As long as gearing equation is correctly stated.	
	OFR	
4(a)(ii)	dividend yield	2
	dividend yield = dividend per share / market share price $\times$ 100 (1 mark if no relevant calculation) Dividend per share = 4.8 / 8 = (\$)0.60 per share (1) OR DY = 0.6 / 3 $\times$ 100 (1)	
	DY = 20% OR 20 (2)	
	2021: Award 1 mark for DY = 4.4 / 8 / $3 \times 100 = 0.55$ / $3 \times 100$ 18.3% OR 18.3 (although share price not known for 2021)

Questions 6 and 7 use this marking grid:					
Level	Knowledge 3 marks	Application 3 marks	Analysis 4 marks	Evaluation 10 marks	
3				7–10 marks Good judgement sh throughout with we supported conclusio recommendation, fo on the business in t case	ll on/ ocused
2	3 marks Good understanding shown	3 marks Good application to the case	3–4 marks Good use of reasoned argument or use of theory to explain points made	4–6 marks Some judgement sl the main body of th answer <b>and</b> an atte support conclusion/ recommendation, fo on the business in t case. <b>OR</b> effective and well supported conclusio recommendation, fo on the business in t case	e mpt to occused the on/ occused
1	1–2 marks Some understanding shown	1–2 marks Some application to the case	1–2 marks Limited use of reasoned argument or use of theory to support points made	1–3 marks Limited attempt to s judgement within th answer. <b>OR</b> a weakly supported conclusion/ recommendation w some focus on the business in the cas	ie I ith
0	0 No creditable content				

Question	Answer	Marks
6	Evaluate the usefulness to WTZ of external environment analysis (PEST) as a framework to develop business strategy.	20
	Note: If there is no reference to or knowledge of PEST analysis then limit to K 2 APP 2 AN 0 EVAL 0 for other points related to strategic analysis as a framework for developing business strategy.	
	<ul> <li>Knowledge</li> <li>PEST – Political, Economic, Social and Technological [reward even though clearly signposted in case]</li> <li>Understanding of different elements of PEST: <ul> <li>Political – laws and regulation</li> <li>Economic – factors influencing demand and macroeconomic environment</li> <li>Social – demographic change</li> <li>Technological – advances in automation</li> </ul> </li> <li>Identification of PEST analysis as a strategic analysis tool.</li> <li>Strategic analysis is the first stage in strategic management answering the question, where are we now?</li> <li>Need to understand the external environment – requiring a detailed PEST analysis.</li> <li>Understanding of business strategy – outlines a plan of action to achieve the vision and set objectives of an organisation and guides decision-making processes.</li> <li>Role of objectives in developing business strategy.</li> <li>Explanation of other strategic analysis techniques – SWOT, Porter's Five Forces, Boston Matrix, core competencies.</li> </ul> Application <ul> <li>WTZ appears to have objective to expand given its history and the growth strategies being considered.</li> <li>Core competency of WTZ is recycling waste materials links to Option 2.</li> <li>PEST applied to WTZ – making use of information in Appendix 1 to illustrate usefulness of PEST.</li> <li>Political - increased regulation provides opportunities and threats to WTZ's core business. Link to potential takeover of Lacpac.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decrease and link to financing decisions.</li> <li>Economic - interest rates set to decreas</li></ul>	

Question	Answer	Marks
6	<ul> <li>Analysis <ul> <li>Analysis is about the use of the techniques to shape strategy</li> <li>Analysis of how PEST might guide strategic decisions: <ul> <li>Reduction in interest rates may enable more ambitious strategy such as Option 1.</li> <li>Opportunities to process plastic waste from developed countries e.g. Option 2</li> <li>Regulation on food packaging may favour takeover of Lacpac.</li> <li>Anticipating changes to the external environment will enable WTZ to take decisions to reduce risk and take advantage of opportunities.</li> </ul> </li> <li>Analysis of how other SA techniques can shape strategy: <ul> <li>Focus on strengths and core competencies in choosing strategy will reduce risk to the business.</li> <li>Identification of weaknesses that need to be addressed when making decisions or alternative sought e.g. financing.</li> </ul> </li> <li>Evaluation <ul> <li>Only award EVAL if the candidate has also demonstrated APP.</li> </ul> </li> <li>Clear conclusion as to the usefulness of PEST and strategic analysis to developing business strategy including: <ul> <li>Critical comments on PEST:</li> <li>PEST on its own is not enough to develop strategy - need understanding of internal factors as well</li> <li>WTZ operates in a dynamic environment so analysis may quickly become outdated.</li> </ul> </li> <li>Importance of understanding where the business is now in order to generate ideas and/or support for expansion.</li> <li>Subjective interpretation of the models – one manager's opinion of SWOT may be very different to another.</li> <li>Ranking the usefulness of the techniques in relation to expansion plans.</li> </ul> </li> </ul>	

Question		Answer		Marks
7	Evaluate the strategic choice techniques that could help WTZ choose between option 1 and option 2.			
		Option 1: Takeover of Lacpac	Option 2: Expansion into country S	
	Driving forces	Rapid market growth in use of recyclable non-plastic packaging in the food industry	Builds on core competencies of WTZ	
	Restraining forces	High cost	Competitive market in country S	
	Capital cost	\$20m	\$10m	
	Accounting Rate of Return (ARR)	15%	10%	
	Decision tree: Expected monetary value Probability of success	\$9m 60%	\$4m 70%	
	<ul> <li>Note:</li> <li>Focus should be on strattechniques</li> <li>If there is no reference to 2 APP 2 AN 0 EVAL 0 for options 1 and 2.</li> <li>Knowledge</li> <li>Strategic choice is part of the strategic choice is part</li></ul>	o, or knowledge of SC to or other factors related t	echniques then limit to K o the choice between	
	<ul> <li>process of identifying and</li> <li>Strategic choice technique</li> <li>Force Field Analysis and</li> <li>Strategic choice technique</li> <li>different strategic options</li> <li>Understanding of different</li> <li>Investment appraisa</li> </ul>	d deciding between diff ues such as Ansoff Mat l investment appraisal. ues help evaluate the ris s. nt choice techniques:	erent options. rix, Decision trees, sks and rewards from ow quickly investment is	
	<ul> <li>Decision trees: inclu outcomes from inves data</li> <li>Force field analysis: decision</li> <li>Ansoff's matrix: cons</li> </ul>	sion of probability to ca stments and make choir considers driving and r	lculate the monetary ce based on quantitative	
	<ul> <li>product and market</li> <li>Quantitative and qualitat</li> <li>Reference to strategic ar such as SWOT, PEST, E competencies and others</li> </ul>	nalysis techniques whei Boston matrix, Porter's F		

Question	Answer	Marks
7	<ul> <li>Application</li> <li>Use of the techniques/factors for two options – Appendix 2 examples.</li> <li>Ansoff's matrix: <ul> <li>Option 1 is diversification (new product development)</li> <li>Option 2 is market development.</li> </ul> </li> <li>Option 2 has higher probability of success and less risk</li> <li>Option 1 has higher net return and ARR</li> <li>Option 2 capital cost is \$10m greater – link to gearing 63.6%</li> <li>Amandi is willing to take risks</li> <li>Driving and constraining forces: <ul> <li>Competition in country S but risk is still estimated to be lower</li> <li>High cost of option 1 and link to gearing.</li> </ul> </li> </ul>	
	<ul> <li>Analysis</li> <li>Techniques encourage directors to consider the possible quantitative outcomes of each strategy. This will help decide which is the best and therefore reduce risk.</li> <li>How techniques may be used and the advantages and disadvantages. Force field analysis encourages managers to consider different aspects of a decision. By identifying restraining forces action can be taken to mitigate the negative effects of those restraining forces.</li> <li>Better decision-making by considering the quantitative aspects of the choices: <ul> <li>Use of probabilities in decision trees therefore reducing risk for WTZ of option choice</li> <li>ARR enables WTZ to choose option with highest return which may be important to shareholders as will influence dividends.</li> </ul> </li> <li>The use of techniques to analyse aspects of the options.</li> <li>Interpretation of Ansoff's matrix to compare the relative risk of each option therefore guiding decision-making. e.g. option 2 might be considered to be market development and therefore lower risk than option 1 so is therefore a better option</li> </ul>	
	<ul> <li>Evaluation Only award EVAL if the candidate has also demonstrated APP. </li> <li>Judgement/evaluation about usefulness of strategic choice techniques supported by e.g.: <ul> <li>Is Ansoff useful in this case as risk more influenced by factors such as potential regulation and market growth.</li> <li>Subjective nature of Force Field Analysis</li> <li>Limitations of using only quantitative or qualitative techniques.</li> </ul> </li> <li>Elements that the evaluation/judgement might depend on such as: <ul> <li>Accuracy of estimates for quantitative techniques</li> <li>Other information</li> </ul> </li> </ul>	

Question	Answer	Marks
7	<ul> <li>Evaluation of other factors that influence choice such as:         <ul> <li>Attitude of directors</li> <li>Attitude to risk</li> <li>Influence of strategic analysis</li> <li>Corporate objectives of WTZ</li> <li>Impact of different strategies on stakeholders</li> <li>Long-term v short-term impacts</li> <li>Other information that might be useful</li> <li>Capital available.</li> </ul> </li> <li>Justification of most useful technique(s) with supporting argument.</li> </ul>
