MARK SCHEME
Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2018 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of 12 printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

the specific content of the mark scheme or the generic level descriptors for the question the specific skills defined in the mark scheme or in the generic level descriptors for the question the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded positively:

marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate

marks are awarded when candidates clearly demonstrate what they know and can do marks are not deducted for errors

marks are not deducted for omissions

answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| 1(b) | Briefly explain <u>one</u> advantage and <u>one</u> disadvantage to a business of operating as a public limited company rather than as a private limited company. | 3 | |
| | Advantages: Easier to raise capital e.g. from existing/new investors. To give company a more prestigious profile – improved reputation. Greater creditworthiness e.g. easier to obtain loans. The opportunity to more easily make acquisitions e.g. by offering shares to the shareholders of the target firm. plc status may reduce expenditure on marketing e.g. greater discounts. Disadvantages: Short-term pressure for profit maximisation/share price may mean | | |
| | compromising overall business aims. More media exposure – potentially more accountability. Greater transparency – accounts must be audited/fuller information on performance provided. No control over who buys shares/less control over business – vulnerable to a takeover/a majority shareholder having a greater say how the business is run. Amount of finance to set up plc is higher. More documentation required to set up. | | |
| | Sound explanation of one advantage AND one disadvantage of operating as a plc. (3 marks) | | |
| | Sound explanation of either one advantage OR one disadvantage, or partial explanation of one advantage AND one disadvantage. (2 marks) | | |
| | Partial explanation of either one advantage OR one disadvantage, or a list of one advantage AND one disadvantage. (1 mark) | | |
| | No creditable content. (0 marks) | | |

| 3 | Explain how an understanding of the 'product life cycle' might help a business manage its product portfolio. | 5 |
| | It is important for a business to know when to launch a new product or update an existing one. A balanced product portfolio is one in which the range of products is one that maximises efficiency in the allocation of resources. The product life cycle (concept) is a mechanism for assisting with product portfolio analysis. The product life cycle is the pattern of sales recorded by a product from launch to withdrawal from the market. It is an analytical tool that examines product sales over a series of stages: introduction, growth, maturity, decline, extension. This analysis assists in reviewing the product portfolio and suggests when changes may be needed. | |
| | Effective explanation of how the product life cycle helps a business manage its product portfolio – answers must clearly show an explicit understanding of both the product life cycle and product portfolio (4–5 marks) | |
| | Limited explanation of how the product life cycle helps a business manage its product portfolio (2–3 marks) | |
| | Understanding of product life cycle / product portfolio (1 mark) | |

| Question | Answer | Marks |
|----------|--|-------|
| 6 | Disadvantages of moving to performance related pay: | |
| | Performance related pay might cause cash flow problems if outflows (manufacturing costs rise) and inflows do not keep pace. Quality may decrease in the rush to maximise earnings. Performance related pay can cause divisions within teams – can lead to favouritism from managers / individuals seeking to drive up their own performance rather than that of team members. Time consuming to implement – more bureaucratic in practice. Evaluative comments could discuss the extent to which performance related | |
| | pay is suitable for all employees in a business. | |
| | It all depends on the cause of the poor performance – there may be more important measures to take. | |
| | Consideration of whether a focus on pay systems neglects measuring quality of work, as it concentrates on a narrow focus on quantifiable goals. | |
| | Impact of a change in payment methods depends on whether employee pay is the or one of the factors causing poor performance. | |
| | It may be other factors such as the quality of employees, or the inadequacy of products / services. | |
| | If payment system is considered to be a significant factor, then incentivising through performance related pay could work. | |
