## Introduction

The main aim of this booklet is to exemplify standards for those teaching Cambridge International AS and A Level Business (9609), and to show how different levels of candidates' performance (high, middle and low) relate to the subject's curriculum and assessment objectives.

In this booklet candidate responses have been chosen to exemplify a range of answers. Each response is accompanied by a brief commentary explaining the strengths and weaknesses of the answers.

For each question, each response is annotated with a clear explanation of where and why marks were awarded or omitted. This, in turn, is followed by examiner comments on how the answer could have been improved. In this way it is possible for you to understand what candidates have done to gain their marks and what they will have to do to improve their answers. At the end there is a list of common mistakes candidates made in their answers for each question.

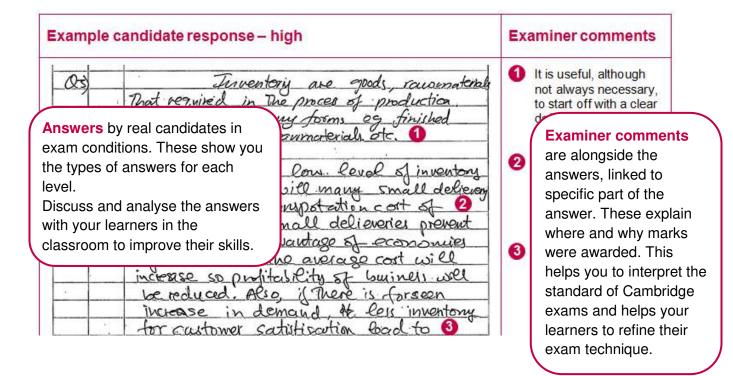

This document provides illustrative examples of candidate work. These help teachers to assess the standard required to achieve marks, beyond the guidance of the mark scheme. Some question types where the answer is clear from the mark scheme, such as short answers and multiple choice, have therefore been omitted.

The questions, mark schemes and pre-release material used here are available to download as a zip file from Teacher Support as the Example Candidate Responses Files. These files are:

## How to use this booklet

## How the candidate could have improved their answer

The second cost of customer satisfaction is not as well benefited from acknowledging that products will be una hence leading to disappointment.

In addition, three benefits have been explained. Presur rather than foreseen but the candidate has explained s answer.

This explains how the candidate could have improved their answer and helps you to interpret the standard of Cambridge exams and helps your learners to refine exam technique.

#### Common mistakes candidates made in this question

(a) Not being able to move beyond Level 2 due to not un of these two types of expenditure and the effect of this of the two expenditures and again the effect of this on the l

(b) Confusion over what classes as an internal source of sales revenue or debentures. This lists the common mistakes candidates made in answering each question. This will help your learners to avoid these mistakes at the exam and give them the best chance of achieving a high mark.

## Assessment at a glance

For Cambridge International AS and A Level Business, candidates:

• take Papers 1 and 2 only (for the Cambridge International AS Level qualification)

or

 follow a staged assessment route by taking Papers 1 and 2 (for Cambridge International AS Level qualification) in one series, then Paper 3 (for the Cambridge International A Level qualification) in a later series

or

 take Papers 1, 2 and 3 in the same examination series, leading to the full Cambridge International A Level.

All components are externally assessed.

Component	Weighting		
		AS Level	A Level
Paper 1 Short answer and essay 1 hour 15 m	ninutes		
Section A: Four short answer questions (20 marks)		200/	100/
Section B: One essay from a choice of three questions (20 marks)		20%	10%
Based on the AS Level syllabus content		20%	10%
40 marks			
Paper 2 Data response 1 hour 30 m	ninutes		
Two data response questions based on AS Level syllabus content		60%	30%
60 marks			
Paper 3 Case study 3	hours		
Five questions and one essay (from a choice of two) based on a ca study	ise		50%
Based on the additional A Level syllabus content and also assumes knowledge and understanding of the AS Level syllabus content	5	_	30%
100 marks			

Teachers are reminded that the latest syllabus is available on our public website at **www.cie.org.uk** and Teacher Support at **https://teachers.cie.org.uk** 

## Paper 1 – Short answer and essay

## Question 1

Exam	ple cand	Examiner comments	
1	a Tr	ne person who combines the resources 1	1 Characteristic 1
	lla es	tablehong the business 2	2 Characteristic 2
ı			Mark for $(a) = 2/2$
	-doe out the	ale many reasons behind the foliuse of new businesses. Lack of record keeping is one of them. If a Company of not keep track of its transactions, cosh in flows and flows, repaying depts will be a much harder process and business might end up bankrupt. This problem occurs	3 Reason 1 well explained.
	4 is	inly due to the inability of these businesses to employ a ffessional accountant. Another problem that is might contribute a new business's falliure is the lack of sufficient finance. I small businesses have a small start-up capital sich might not be enough to gover all the needed facilities	<ul><li>4 Reason 2 well explained.</li><li>Mark for (b) = 3/3</li></ul>
	Hol Sn	equipments to ensue the flow of the business operations.  reover, banks are often religiount to provide loans to  nall businesses and that Alt might contribute to the  usufficient finance.	Total marks awarded = 5 out of 5

## How the candidate could have improved their answer

**(b)** The candidate identified record-keeping and lack of finance as the two reasons. Their explanation related to the difficulty of repaying debts and buying all the needed facilities. A shorter answer (missing out the third sentence for each reason) would still have earned full marks and saved time.

#### Example candidate response - middle **Examiner comments** The entrepreneur is not guterpreneur the invectors necessarily the only the owner wno one to invest: this om d answer would have husiness been better linked to to the risk of investing al the decisions ore allen money in a start-up the business. The entrepreneur is not the only person who takes decisions, although they take the leading role in this. Mark for (a) = 1/2Businesses often fail in their early Having very little or no have very Uttle or no 3 market share will they are raving high market shares and usually be a temporary situation when first production costs starting a business; this then builds over time. High production costs are cited for 2 marks. Mark for (b) = 2/3Total marks awarded = 3 out of 5

#### How the candidate could have improved their answer

- (a) Two characteristics are given here, although these are vague and at least one of them required more precision to gain a full two marks. The entrepreneur is not necessarily the only one to invest. This answer would have been better linked to the risk of investing money in a start-up business. Similarly, the entrepreneur is not the only person who takes decisions, although they take the leading role in this.
- **(b)** The candidate gave brief details of one reason for failure, high production costs. The other reason given, having very little or no market share, will usually be a temporary situation when first starting a business. To gain a further mark for this question, the candidate needed to add that, due to strong competition in the market, a business can fail to gain sufficient market share and revenue to continue to operate.

#### **Examiner comments** Example candidate response - low Although stating 'owner F 1) any who person of the company' might 20 the to Othe operations have been creditworthy he she here, the preceding company. sentence makes this doubtful. Mark for (a) = 0/2Reason 1 stated. Reason 2 stated. 2 or they Reason 3 stated but not needed. Mark for (b) = 1/3Total marks awarded = 1 out of 5

## How the candidate could have improved their answer

- (a) The candidate did not clearly show that they understood what an entrepreneur is; their answer could describe a stakeholder. They needed to develop their answer to say, for example, that the entrepreneur paid to set up the business and therefore owns and runs it.
- **(b)** The candidate stated three valid reasons new businesses fail but did not add any explanation. As a result, this response gained the mark for 'a list of two reasons'. Some development of the two points was needed for the other marks.

## Common mistakes candidates made in this question

(a)

- Stating that the entrepreneur is the owner of the business or the person running the business, without any explanation.
- Vague comments such as 'gains benefit from the business'.
- Naming an entrepreneur without any reference to what makes them one.

(b)

• Making two points which were in fact the same point expressed in two different ways.

## Question 2

out in the targeted population till the the desired quota is	Correct definition.
	<ul><li>Correct, though could have been clearer.</li><li>Mark for (a) = 2/2</li></ul>
	3 A succinct answer which briefly explains time and bias. The first sentence is the weaker of the two explanations.  Mark for (b) = 3/3  Total marks awarded =

## How the candidate could have improved their answer

- (a) Both definitions were correct, although the sentence about 'quota sampling' could have been made clearer by giving a specific example, rather than adding the final sentence which did not clarify the answer.
- **(b)** A succinct answer which briefly explained time and bias. The first sentence was the weaker of the two explanations. It would have been clearer to add to the first sentence that sampling can mean that the staff conducting the market research waste time waiting for representatives / people to question.

## Example candidate response - middle

2	a	In random sampling people are selected
		randomly and the information I research is
		based on carried on them. 1
300 110 100 100		In quota sampling people from different
		In quota sampling people from different age groups are selected and research is
		carried on mem. 2

Fxa						
⊢v2	mın	Δr	$\boldsymbol{\sim}$	mr	na	nte

- 1 The candidate does not demonstrate understanding of random sampling here; saying 'selected randomly' is just repeating material from the question.
- 2 The quota sampling definition is not particularly precise, but understanding is shown in the description of different age groups being selected.

Mark for (a) = 1/2

The candidate only explains one limitation, i.e. not being representative of the entire population, but they do this in two different ways making this a sound explanation.

Mark for (b) = 2/3

Total marks awarded = 3 out of 5

Ь	As some spe people who are selected from
*************	sampling are only questioned it is possible that no their view is I readirement is not
	Trat 40 their view is / requirement is not
	everyone requirement I need and secondu
	in sampuing when some people are selected
	who are relatives of each other (to make
	it easy) it is mighty possible mot there
	there are high chances most their view
 	J
 	is not me view of majority of consumers. 3

## How the candidate could have improved their answer

- (a) The candidate did not demonstrate understanding of random sampling here; 'selected randomly' is just reusing the word 'random' from the question. They needed to show that they knew what the term 'random' means, i.e. that everyone has an equal chance of being asked. Although the quota sampling definition was not particularly precise, the candidate showed understanding about different age groups being selected.
- **(b)** The candidate only explained one limitation, that of not being representative of the entire population, although they did this in two different ways, thus explaining it soundly. A clearly different second limitation was also needed, such as the cost or its time-consuming nature, along with a brief explanation.

## Example candidate response - low

2	(a)	Bandom Sampling is when a survey is done
		on a selected group of people - in which
		the group is chosen without exact specification
		and members may have various qualifies. 1
	;	Quota sampling is more specific to the needs
0.00		of the survey and which kind of exprisant
		candidate is accessioned. This could be a method
	ļ	of rease researching specific data e.g. a company with original
		Customers

2	p	Manket-opposearch it is a
		systemetic way of gathering the information analysing it for the betterment of the 3 costomers. Limitations of Morket reasons
		costomers. Limitations of Morket reapports
		18amplings are it is and not occurate 4
		information and primary research is quet expensive to be increased the firm's overall
		expensive 5 which increases the firm's overall
		cost as secondary nesearch is not the
		first hand information it cannot be trusted
		Morpet Research sampling is also a sick
		Morret Research sampling is also a sisk conich is taken by firm but not a big sisk
		,

#### **Examiner comments**

- A vague definition. The term is not accurately defined.
- 2 A vague definition. The term is not accurately defined.

Mark for (a) = 0/2

- This sentence is not needed.
- 4 Limitation 1 is not explained, e.g. 'because the questions asked are ambiguous or because the sample size is too small'.
- b Limitation 2 is not explained, e.g. 'because staff must be paid to prepare questions and documents and then either distribute questionnaires or interview people'.
- The comment regarding trust is too vague to class as a limitation. There is no explanation of why market research might not be trusted. Again, it may not be accurate due to small sample size or ambiguous questions.
- 7 The final sentence is not relevant to the answer.

Mark for (b) = 1/3

Total marks awarded = 1 out of 5

### How the candidate could have improved their answer

- (a) The candidate did not answer the question and appeared to be confused about product sampling. Definitions need to be accurate to gain marks and this answer did not show that the candidate understood the methods of sampling used in market research.
- **(b)** Two limitations were identified: inaccurate information and high cost, but these were not explained, which meant that the answer was classed as a list. The candidate did not really focus on the question even though they demonstrated understanding of market research. Following 'not accurate information', the candidate might have added a reason, for example, the questions asked may be ambiguous or the sample size may be too small. They could also have pointed out that sampling is expensive because staff must be paid to prepare questions and documents and then either distribute questionnaires or interview people. The comment regarding trust was too vague to class as a limitation, and no explanation was given as to why sampling might not be trusted. The final sentence was not relevant.

### Common mistakes candidates made in this question

#### (a)

- Repeating the terms from the question without explaining them, for example 'in a random sample people are selected randomly' and 'in quota sampling the sample is made up of a quota of people'.
- · Confusing quota sampling with systematic sampling.

#### (b)

- Appearing to list two limitations which were actually the same limitation expressed in two different ways.
- Stating limitations that related to general market research rather than specifically to sampling. This was accepted for full marks if explained correctly.
- Discussing primary and secondary market research.
- Discussing market orientation and product orientation.

## Question 3

Example	candidate response – high	Examiner comments
Q3	Therentory are goods, raisonaterals  That required in The process of production.  It may be in many forms og finished  work in progress, rawmaterials ot. 1	1 It is useful, although not always necessary, to start off with a clear definition like this.
	Cost of holding low level of inventory is That there will many small delicion that increase transpotation cost of 2 business Also, small delicences prevent business taking advantage of economics	2 The effect of small deliveries is well developed.
	J sale. Thus The average cost will increase so profitability of buiness will be reduced. Also, if There is forseen increase in demand, It less inventory for customer satisfication load to 3	3 The second cost (customer satisfaction) is not as well explained, but is still clear. It may have benefited from
	Constitutement hence reducing brand loyality,  Benefit of holding low level of inventory is that It helps to reduce	acknowledging that products will be unavailable for customers to buy if demand increases, leading to possible
	opportunity cost tied I up in inventories.  The cash can be used in more profitable way eg & buying a sets 4  Socondly, reduce storage cost freed space can be used in more productive use. And less wastege and oblescene	disappointment.  Three benefits are explained: opportunity cost, storage cost, less wastage/ obsolescence.
	Buss as less stock lewl so lesser chance of being depreciated, Lauraged	Total marks awarded = 5 out of 5

## How the candidate could have improved their answer

The second cost of customer satisfaction was not as well explained but was still clear. The answer might have benefited from acknowledging that products will be unavailable for customers to buy if demand increases, leading to possible disappointment. Three benefits were also explained. Presumably, the increase in demand would be unforeseen rather than foreseen, but the candidate explained this sufficiently well so this omission did not affect the overall mark.

cample	e candidate response – middle	Examiner comments
<b>Q</b> 3	There can be many advantages to a business of	
	haloling law inventor, level, as it may saves the storage	
	cost of the bewiness, no vent to be paried for the wave	<b>A B C</b> ( <b>A B C</b> ( <b>A B C</b> ( <b>B C</b> )
	-hause, as invadory would be ordered when needed 1  Seconally the inventory kept with the business, if law	Benefit 1 explained.
	would'nt be aut dated, if stored as if the austomer 2	
	teste or trends changed so it would a great advantage	2 Benefit 2 explained.
	to business of holding less inventory level, and wanted	
	capital would'ut be tied into the cash could be used	
	Stocks, so it would cost a business then the shift unit of 3	<b>3</b> Benefit 3 explained.
	as the cash instead of halding cauld be used to fail	
	to emplayes, and overheads. Transporteding cost would	
	lee caved, and the halding high truendary cast would be	
	Laweved dawn. So keeping a law level of inventory can	Total marks awarded =
	contribute in the lowering of business costs.	3 out of 5

## How the candidate could have improved their answer

This answer explained a number of relevant benefits gained from holding low levels of inventory. However, it did not cover the costs and, as a one-sided answer, it could only be awarded a maximum of three marks. The candidate could have improved their mark if they had explained just two of the benefits and then covered at least one cost.

#### Example candidate response - low **Examiner comments** A benefit is given here holelin business (reduced fixed cost). level 38 inventoney but not developed into final to an explanation. The inventore candidate needed to Of state that reduced fixed costs are due to lower the rent as a result of not Low. The needing large storage facilities. Level competitors scale The benefit of a lower overthrow salary bill (as a result scall production of needing fewer staff to manage the in the inventory) is not developed here. The candidate identifies a cost (no sudden large orders), but this needed more development to show that there would be no spare inventory to increase production in the short term, therefore sudden large orders could not be taken. The final point (the lack) of economies of scale making prices uncompetitive if there are strong rivals in the market) is not clear enough. Use of the term 'the power to overthrow' is not appropriate here. Total marks awarded = 2 out of 5

#### How the candidate could have improved their answer

The candidate needed to develop their explanation of the points they included. They identified a benefit (reduced fixed cost) and a cost (no sudden large orders) but did not develop these with explanations. They needed to comment on reduced fixed costs being due to lower rent as a result of not needing large storage facilities, or a lower salary bill being due to needing fewer staff to manage inventory.

The cost also needed more developed explanation to show that there would be no spare inventory to increase production in the short term, meaning unexpected large orders could not be met.

The final point lacked clarity about the lack of economies of scale making prices uncompetitive if there are strong rivals in the market. Use of the term 'the power to overthrow' was not appropriate here.

#### Common mistakes candidates made in this question

Considering only costs or benefits and therefore being limited to three marks maximum.

## Question 4

# Example candidate response – high **Examiner comments** Although the candidate clearly shows that they can distinguish a job description from a person specification, this answer is quite brief. However, there is a good enough distinction for the two marks available. Mark for (a) = 2/2First way explained. Workers usually leader through 3 Second way explained. Third way explained. Mark for (b) = 3/3Total marks awarded = 5 out of 5

## How the candidate could have improved their answer

- (a) Although the candidate clearly showed that they could distinguish a job description from a person specification, this answer was quite brief. The job description definition could have been improved by referring to hours, holidays and pay, while the person specification definition could have referred to skills and personality traits rather than just qualifications. However, there was a good enough distinction for the two marks available.
- **(b)** This candidate explained three ways: quality circles, informal leaders and business meetings, although two of these methods were enough to earn the marks

## Example candidate response - middle

Ans 4	_a)_	Job description is a document which contains all of
		the information which a job requires. It mostly is
		designed when a worker has to be found for a job.
		It contains what will be the working hours of the
		job, job conditions, what the worker will have to do However,
		Person specification is a document only design for one
		worker and his job, jod condition, job hours and salary is
		written.

[ b)	An employee can participate in the 2
	business decision making by being
	more active in the job, by showing
	The owner his ability and his shills
	so the owner feels important to heep
	me employee at decision making in
	order to achive better business performace
	In Sunocrat An employee can
	participate in decision making if
	The leadership style is democratic
	as employees belo in the decision
	as employees belo in the decision making it is a de-centralized 3
	approach. Mere is two way commical
	0

#### **Examiner comments**

The candidate clearly understands what a job description is and has given a very good definition. However, they do not know what a person specification is and appear to have made an educated guess (a job description for a particular person).

Mark for (a) = 1/2

- The first point is too vague. This could have been improved by commenting that a hardworking and trusted employee, who has proved his worth to the owner, may be invited to contribute to decision-making due to their experience.
- The candidate earns two marks for the second point about leadership style, by explaining that, with two-way communication, employees can participate in decision-making.

Mark for (b) = 2/3

Total marks awarded = 3 out of 5

## How the candidate could have improved their answer

- (a) The candidate clearly understood what a job description is and gave a very good definition, but an accurate definition of person specification was also needed. They appeared to make an educated guess that it is a job description for a particular person. The candidate therefore failed to distinguish between the two documents.
- **(b)** This candidate earned two marks for their second point about a leadership style where two-way communication can allow an employee to participate in decision-making. Their first point, however, needed to be clearer. It could have been improved by adding that a hardworking and trusted employee may be invited to contribute to decision-making in recognition of their experience.

## Example candidate response - low

04	(a)	Job description is describing specifying 1 what qualification is required for the 2 job or what eligibility the job stands
	,	what qualification is required for the
	· ,	gob or what elloghelpy the gob stands
		for
		Derson specification is the designation 3
		assigned to the employee for his
		10h

An, 4 (3)	The employees would partition in
	business idention making by two ways.
	One way is that, the specific person should be
	on the high level position in the business so 4
	he could also take part in some devision making.
	The second way is by howing open ideas, which other manages or Ast authorities would 5
	which other manages or Ast authoribes would
	approuse and their trey would mostly depend
	or you

#### **Examiner comments**

- 1 It is not a good idea to put 'describing/specifying' as this immediately fails to separate the two documents.
- The candidate does not distinguish between the two documents here.
  Qualifications have been cited for the job description, not the person specification.
- 3 If the designation referred to in the person specification means the job title, then that should go in the job description.

Mark for (a) = 0/2

- 4 The first way given here is too vague. It implies that the person is already in management and therefore part of the decision-making team. This is not really what the question is asking.
- The candidate gains one mark for the second way given here, but this lacks an explanation of how those ideas would be communicated to managers, e.g. through a suggestion scheme or raising them at meetings with managers.

Mark for (b) = 1/3

Total marks awarded = 1 out of 5

#### Paper 1 – Short answer and essay

### How the candidate could have improved their answer

- (a) The candidate failed to show understanding of this topic and simply attempted to use appropriate words in the hope that they were correct. Sometimes this approach can pay off, but often, as in this case, only thorough knowledge of the specification will gain marks.
- (b) This candidate was awarded one mark for the second way suggested here, but this lacked an explanation of how ideas would be communicated to managers, for example, through a suggestion scheme or by raising them at meetings with managers. The first way given was too vague as it implied that the person was already in management and therefore part of the decision-making team. This was not really what the question was asking, although further explanation might have improved the answer. For example, the candidate could have said that employees could be invited to attend board meetings or participate in focus groups to represent their area of the business. It is important to develop an explanation, as some points may seem incorrect without it.

### Common mistakes candidates made in this question

(a)

- Repeating the terms in the question with no explanation, for example: the job description is 'a description of the job' and a person specification is 'the specifications of the person'.
- Calling a person specification a job specification, although this was given benefit of the doubt if it was
  explained correctly.
- Confusing a person specification with a curriculum vitae.

(b)

• Identifying but not explaining the ways employees can participate.

## Question 5

#### Example candidate response – high **Examiner comments** 05) an capital expenditure is one - time Clear distinction expenditure that gives the business 1 between the two types. advantage for a number of years. Revenue expenditure is expenditure relating to the day- to-day activities of the business. The purchase of new machinery is a capital expense, whereas, repairs to the machinery is a revenue expenditure. It is important for a business to differentiate between revenue expenditure and capital expenditure because revenue expenditures are accounted for in the income statement under the profit and loss account. If capital expenditure is included in the profit and loss account the profit for the financial year of the business will be misleading. The profit figure will be too low or may even show This paragraph is clear a loss for the year. Hence, to give 2 and logical and an appropriate, unbiased profit figure includes the features for the year, a business needs to that the examiner is expecting to see. It is distinguish between revenue expenditure awarded Level 4 and capital expenditure because it is a good analysis, showing clear capital expenditure occurs in one single chains of reasoning. financial year but the business can benefit for a number of years. For example the purchase of machinery. This machinery will stay with the business until it is totally depreciated, becomes obsolete or technological change in the production There is less process takes place. The cost of the development of the machinery is usually split between the reasoning in this number of years of, expected use This paragraph and it does helps the business, show a realistic profit not reach Level 4 standard; therefore the Figure of the business. score is 7 rather than 8. Distinguishing between capital and revenue expenditure belos not understailing or overstating the amount of expenses and Mark for (a) = 7/8bence not baving an adverse effect or showing a false profit figure for the financial year.

cample candidate response – high, continued	Examiner comments
(b) Businesses do mot always have the required amount of finance with them in order to perform any activity.  Even the very successful businesses need to raise finance from different sources in order to continue with the control remaining of the business.  Businesses can raise finance internally and externally Raising  finance for to a tusiness activity internally a considered to as an easier option at times. ext.  These are a number of different sources a business can use to in order to internally raise finance.  These metude sale of assets of a business such as equipment, stock to raise finance. Moreover for incorporated businesses, finance for incorporated businesses, finance for through in vance of them rue of shorters or making right indues.  Furthermore have purchase and leasing can be used to pay for ext using equipment in pret periodic installments. Businesses can also raise finance by asking the order for pay method as and do not allow for long early period credit periods.  The possible benefits for finance ase a cheap method to finance a business since here are no money cost of like by selling an asset no interest mater has sources for a finance as e permanent method to be a permanent method since the finance is consided to be a permanent method since the finance or paid back.	<ul> <li>4 Initially, some incorrect sources of finance are identified, such as the issue of shares, hire purchase and leasing.</li> <li>5 Shortening the debtor repayment period is an internal source but is used more for working capital and is unlikely to be used to fund expansion.</li> <li>6 The sale of assets is the only relevant internal source identified.</li> </ul>

# Example candidate response - high, continued **Examiner comments** Ignored. 8 The analysis and observed evaluation of the benefits and drawbacks of internal sources of finance to fund expansion are strong. The candidate expano produces some good context and good analysis with some effective evaluation. As a result, there is sufficient relevant material to award Level

example candidate response – high, continued	Examiner comments
to raise such substantial amount for activities like expansion, using internal fivance  Moreover as argued, business sell assets to raise finance internally, this reight not be are a reliable option if businesses wish to we the asset e.g. an equipment in future. In such cases hire purchase or ceasing can be an expensive oftion compared to writing the asset.  Not only this but when selling these assets to raise finance basinesses might deprive themselves of these the option of keeping them as collateral for any other activity.  Collateral for any other activity for the more raising capital through is ving shares means that dividends eventually have to be paid out to share holders and it becomes a	Examiner comments
permanent expense. There is also a chance of loss of ownership in such cases.	
cound be funded solely with use of internal sources of finance, since they one very limited.  The productivity of expansion also	
refutive thus internal cources  not enough.	Mark for (b) = 10/12
ı r	Total marks awarded = 17 out of 20

### How the candidate could have improved their answer

- (a) This response was clear and logical and included all the features that the examiner was expecting to see. It was given Level 4 because of good analysis showing clear chains of reasoning in the second paragraph. There was less development of this reasoning in the third paragraph, which was not Level 4 standard; therefore 7 marks were awarded rather than 8. To improve the answer, the candidate could have explained, for example, why the purchase cost and the depreciation of machinery are shown on two different financial accounts, unlike revenue expenditure.
- **(b)** There was some irrelevant material in this response and this was ignored. Initially, some incorrect sources of finance were identified, such as the issue of shares, hire purchase and leasing. Shortening the debtor repayment period is an internal source but is used more for working capital and is unlikely to be used to fund expansion. The sale of assets was the only relevant internal source identified. However, the analysis and evaluation of the benefits and drawbacks of internal sources of finance to fund expansion were strong. The candidate produced some good context and good analysis with some effective evaluation, sufficient to award Level 4.

The candidate could have improved their answer by making it clear that their examples of external sources of finance have drawbacks which internal sources do not have. They might also have discussed retained profit in addition to sale of assets. By contrasting the benefits and drawbacks of internal and external sources, they would have improved their evaluative comments relating to when internal sources may be more or less useful.

## Example candidate response - middle **Examiner comments** Revenue The candidate understands the difference between revenue and capital expenditure, as shown by the definition and examples here. The importance of the difference is related to profit and non-current asset over- or understatement and the possibility of the business then not using accurate figures to calculate financial ratios, meaning evaluation of performance is flawed. The answer is given Level 3 because most of the analysis is partial, i.e. one step reasoning. Slightly better developed reasoning is shown in the final sentence (note the use of 'because' and 'leading to'.) Mark for (a) = 5/8

# Example candidate response - middle, continued **Examiner comments** 4 The candidate correctly identifies retained profits as an internal source of finance; introducing a new partner and selling shares are external sources. 5 There is strong analysis shown in discussion of the benefit of reduced risk.

## Example candidate response – middle, continued **Examiner comments** 6 There is less strong analysis when discussing the use of retained profits. The reasoning relating to introducing a new partner and selling shares has been ignored due to these not being internal sources. 8 Up to this point, the candidate has achieved 6 marks (Level 2). The final sentence relating to the opportunity cost of choosing only internal sources then moves the answer into Level 3, as this is an evaluative comment. Mark for (b) = 7/12Total marks awarded = 12 out of 20

## How the candidate could have improved their answer

(a) The candidate understood the difference between revenue and capital expenditure, as shown by their definition and examples. The importance of this distinction is related to profit and non-current asset over- or understatement and the possibility of the business then not using accurate figures to calculate financial ratios, meaning evaluation of performance is flawed. This answer was given Level 3 because most of the analysis was partial, one-step reasoning. Slightly better developed reasoning was shown in the final sentence (with the use of 'because' and 'leading to').

For the essay-style questions, more developed reasoning with fewer points was needed and the candidate could have improved their answer by making more use of words and phrases such as *because*, *therefore*, *leads to*, *meaning that*, *as a result*, *due to this*, *the effect on the business is that* . . ., etc.

**(b)** The candidate correctly identified retained profits as an internal source of finance; introducing a new partner and selling shares, however, are external sources. There was strong analysis of the benefit of reduced risk but less strong analysis when discussing the use of retained profits. The reasoning relating to introducing a new partner and selling shares was ignored, as these are not internal sources. The candidate initially achieved 6 marks (Level 2), but the final sentence moved the response into Level 3 as it was an evaluative comment.

To improve, the candidate could have included more developed reasoning relating to the inability to raise the amount of finance required or the effect on shareholders of using retained profit. This would have strengthened the evaluation by recognising that this measure would depend on the attitude of the shareholders or the extent of the expansion.

already made.

Mark for (a) = 4/8

#### Example candidate response – low **Examiner comments** 005 (a) Distinguishing between revenue and capital expanditure have great importance. Revenue expenditure run the daily enpenses, day to day expense and capital expenditure the dost of the which lasts for more then me year Distinguishing between this is important, as business about its revenue expenditures this Is the expenditure to men the daily expenses, if bushex would'not distinguish then it might create Problems for the business such as Pashflaw Problem. Revenue used to cover the daily cost of the business such as paying their pending bills, Payment to the gupplier, and the wages to the workforce, of all the veve revene is invested on capital expanditure, The candidate shows clear understanding of Such as machinery, and land and you want assets the difference between then of would create difficulty for the business to revenue expenditure sursive Revenue expenditure tells the and capital expenditure costs of deally expanses with some relevant are the enpenditures one Capital expenditure examples applied to a business context, assets that last for more then one year, placing this answer in can be land and machinery, hawever Level 2. beep a balance of spending on both as if business spend The attempt to analyse exiperoliture, buying more land and machinery ?+ the importance of this cashflaw problem as difference is vague, e.g. 'would create cash norting es enfond, greater no of flow problem'. How and needed so the over heads why problems would occur is not discussed would become therefore 4 marks only business to spend on "its revenue expenditure, can be awarded. would make shartage of capital in However distinguishing between the capital In the second half of expanditure is very significant as it as the answer, the candidate is largely the expenditure assures business daily east repeating points

The spending large ammaunt on that assects

Example candidate response – low, continued	Examiner comments
(a) Internal Saurce of finance is the money raised from with in the business, which may include retained profits of business internal source of finance can have many bearifits and draw back.  At first a business could use retained profits this the finance that a being made from profits and is saved with awner, once the retained profits being in the business for explusion. It would not be then evaluable to the numer of machinesty can then sales and make profits and then business would make profits and then retained profits are being made. Secondly if the business have asset that is hat in the use of the business, so the awner cauld sell the asset and the finance get from the sald of the business can be used in the expansion, but it have a disadvantage to the business to make the ameriship is transfered to the buyer, and then it wayld take a lang ferical of time for business to make the adequate profit and to wast invest in the beatiness to buy that asset again. It can be the machinery or	The use of retained profit and sale of assets are identified as valid internal sources of finance, together with some analysis. For example, retained profit, once used, is no longer available until it is replaced by future profit; sold assets are also no longer available to the business.  Mark for (b) = 5/12  Total marks awarded = 9 out of 20

### How the candidate could have improved their answer

(a) The candidate showed clear understanding of the difference between revenue expenditure and capital expenditure, with some relevant examples clearly applied to a business context, placing this answer in Level 2. However, their attempt to analyse the importance was too vague to be rewarded, for example 'would create cash flow problems'. How and why problems would occur was not discussed, therefore four marks only were awarded. In the second half of the answer the candidate largely repeated points already made.

To improve, the candidate needed to develop their reasoning more. For example, where they wrote 'this would create cash flow problems because . . ., These cash flow problems would lead to . . . and therefore the businesses would . . .' the candidate might have referred to the importance of recording the two expenditures differently in the financial accounts and the subsequent effect on assets and profits.

**(b)** Retained profit and sale of assets were identified as valid internal sources of finance, together with some analysis, i.e. retained profit, once used, is no longer available until it is replaced by future profit. Sold assets are also no longer available to the business. Leasing is relevant and the idea is to lease out an asset belonging to the business 'which may provide a fixed amount of finance to business'. The reference to shares and hire purchase was not rewarded as this was inaccurate. The end of this answer was a summary and not an evaluation. The answer was in Level 2 but did not show strong analysis or provide evaluation, therefore five marks were awarded.

To improve, the candidate might have included some evaluation by recognising that a small or new business would perhaps not have made enough retained profit for expansion and therefore might need to use external finance, while a larger or longer established business might be able to rely more on retained profit. When evaluating, candidates must recognise that not all businesses have the same circumstances and requirements and it is this which will decide whether internal finance alone can fund their expansion.

## Common mistakes candidates made in this question

- (a) Not being able to move beyond Level 2 due to not understanding the difference in funding and recording of these two types of expenditure and the effect of this on the business, or not understanding the long-versus short-term nature of the two expenditures and again the effect of this on the business.
- **(b)** Confusion over what classes as an internal source of finance. Many referred to selling shares, some to sales revenue or debentures.

Citing selling inventory as a suitable source of finance to fund expansion.

# Question 6

kam	nple	candidate response – high	Examiner comments

## How the candidate could have improved their answer

There was little to fault in this answer, but to secure full marks the final comment could perhaps have recognised that there are different types of retail businesses and that the customer expects to be more involved in some than in others, For example, this may move the bias towards the 4Cs for a wedding garment retailer, and more towards the 4Ps for a food retailer.

# Example candidate response – middle **Examiner comments** Marketing model refer is to when business before launcing it's product answer's linked bussiness busines is ausiness has to Doodrut consider which is best ( ) roduct. for example or the good consumed in itis market 1 The candidate explains answer's both the 4Cs and the accounting consumer's. 4Ps and distinguishes Consumer between them, using the context of retail businesses.

cample candidate response – middle, continued	Exa	aminer comments
are determined which will benifit the business.  Thirdy Commication to Consumer. In this retall business has to determine the best way of communication with consumer so they could be able to know about the product for example if retail business has set elder people as these consumer so they will mensage them on phone as mostely to most of the elder's have phone's.  Fourthely retail business has to make product convience to the consumer. They have to estate select a coay to make it easy to unformer's to purchase their product for example home dilevery's etc.  'The 4c's marketing model is more useful for a retail business than the 4ps and marketing model" It could I belive it depends on the retail business wheather it is market oriented or product oriented business of the better model for marketing mix would 3 be the 4c's as market origanted business are those bugsiness which study the market and produce the	2	The candidate begins their analysis of the statement by quoting it here, continuing their analysis to the end of the essay.  Limited evaluation is achieved by considering that the best model depends o whether the business is market- or productorientated. This is just enough to move it into Level 4.

Example candidate response – middle, continued	Examiner comments
product accounting the demand of market market. If the retail bussiness is product oriontated then the perfect model for it of marketing mix would be the up's as product origanted bussiness are those bussiness which work's on there product as they are able to produce only that product and target. Such market where that product is needed to sell them. Ye's Retail business should adopt the marketing model as it would be easy for them to analise tear customer or consumer and they could produce good's accounting there demand on the affordable prices by the consumer and they could move how to communicate with the customer with the best method of communication and the retail business would know where they can find there consumer and will make consumer for these consumer and will make consumer for these consumer to buy the product. Retailer's mostely buy's product forom industrie;	Examiner comments
so they will wife the help of lie's buy product which is demanded in the montest by the consumer's.	Total marks awarded = 13 out of 20

The candidate explained both the 4Cs and the 4Ps and distinguished between them using the context of retail businesses. The start of the analysis of the statement was indicated by quoting it. Limited evaluation was achieved by considering that the best model depends on whether the business is market- or product-orientated. This was just enough to move the answer into Level 4.

It would have improved the answer if the candidate had given specific business examples to illustrate their valid point about product- vs. market-orientation. They did not indicate whether they agreed or disagreed with the statement, meaning that the mark remained at the lower end of Level 4. A comment such as 'I agree with the statement because . . . ' would have moved the response to the top end of the level.

Example of	candidate response – low	Examiner comments	
6	The 40s marketing meedel is more usefull for a tritail bussiness then the 41s marketing meedel. As because Marketings is managemental task that Tink bussiness with customer needs by preparing and providing right product at right time at consult place too. ceensemer Product is basicly Consumer need to full till its need according too its demand and desir. The 41s marketing model means Product, Price, Place, Production where 40s include Customer Choice, Cost to customer, Conveine to customer choice Cost to customer, Conveine to customer choice for the Customer etc. 41s based why I can product which conly can involve product varientation which is a invasal looking approach and only yours on Product with his focus on consumer need on having no market research. As 40s have; 44s ushich is lent word looking approach having specific focus on consumer demand their choice etc. The Main objective of Business is to design a product that is according to what without should have to do unhat without which would attreet them and thouy which would attreet them and thouy long it— this will also results in an increase in number of soles and profit which will cause its demand to haise and a greed name will appear of	There is evidence here that the candidate understands both the 4Cs and the 4Ps, but no context is given for a retail business, so only Level 2 can be achieved.	
	a Company The raising demand can also cons it provided a brand name.	Total marks awarded = 8 out of 20	

There was enough evidence in this answer that the candidate understands both the 4Cs and the 4Ps, but they provided no context for a retail business so only Level 2 could be achieved.

To improve, the candidate could have used an example of a retail business and explained how the 4Cs and the 4Ps would apply to it. This context would have moved the answer into Level 3. The candidate did not really address the question or suggest when the 4Ps model might be better than the 4Cs or vice versa. This would have led to some analysis and improved the mark to 12.

#### Common mistakes candidates made in this question

Some candidates did not understand that one of the 4Ps is Profit. Some did not understand the 4Cs, limiting their answers to Level 2.

		recorded to make it more lively. However, not all
		retailers have website for their business hence only
		broated companies can use this usay.

7 Effective evaluation (at Level 4) is shown in the reference to a management meeting being more beneficial (as well as considered to be the best way in the conclusion).

Example candidate response – high, continued	<b>Examiner comments</b>
Jastly having preate communication with each workers through letter, telephone or email to that corporate objective is well understood by every worker thowever, the himitation is that it is very expensive, and the workers make be so many that individual explanation is impossible. Conclusively, a large food retailer with many shops have many ways to communicate corporate objectives to the workforce and each have some benefits and limitations. However, the best way could be meeting with managers tubio their acommunicates with 8 the subordinates since it is relatively cheaper and every workforce could be well explained of the objective.	<ul> <li>The conclusion clearly makes a supported judgement as to which method is the most effective.</li> <li>Mark for (b) = 9/12</li> <li>Total marks awarded = 16 out of 20</li> </ul>

(a) The candidate produced a clear answer, with three well developed points raised. They applied their answer to a large business, which was the context needed to achieve Level 3. The analysis was good enough for Level 4, because the reasoning was developed, with both positive and negative aspects to each point. For example, the unity aspect was countered by the workers also needing to be listened to in order to maximise productivity.

In order to improve, the candidate could have given examples of the corporate objectives which would enable a large business to achieve the three points of unity, motivation and monitoring of progress.

**(b)** This candidate showed clearly and logically how corporate objectives can be communicated to all workers in all the shops of a large food retailer. They explained the positives and negatives of each of the six methods they chose and included developed reasoning in their analysis, therefore fulfilling the requirements for Level 3. Effective evaluation to achieve Level 4 was demonstrated in the reference to a management meeting being more beneficial.

To improve, the candidate could have looked at the other five methods given in comparison, and maybe suggested circumstances in which they might be better than a management meeting. This would have involved recognising that there are different corporate objectives and that verbal communication may not always be the best way of communicating these. For example, if the corporate objective refers to increasing sales and market share, it may be that graphical representation of the current and desired position could be effectively displayed on the website or staff noticeboard, with frequent updates to highlight success in achieving the objective.

Example candidate response – middle	Examiner comments	
7 A Corporate objectives are a set of aims and objectives  Set for the business to be achieved whether on the short-run  or the long-run. These objectives should be SMART,  specific, measureable, achieveable, realistic. Relevant and  time specific. It differs from company to so business to business.  All businesses must make their objectives clear to and  all stake holders, especially the work force. Lefting the  workfare know the company's target will help the to find  of the most efficient way to achieve it and work on reaching  that aim.	<ol> <li>Understanding shown.</li> <li>The candidate gains</li> </ol>	
Furthermore, I these objectives give an overall sense of 2 purpose. This can motivate the workers by giving them a sense of security that they are not working for nothing but trying to achieve a specific target that would affect positively on them as well.  Moreover, the corporate objectives provide a vision for the future. Since these aims are supposed to be achieveable, Not to mention, it can act as a guiding and control tool since the actual performance of the business will be compared with the actual targets of the business will	Level 3 in the third paragraph as a result of showing developed reasoning. However, there is not enough to raise the answer higher in the level as the context is weak.	
	Mark for $(a) = 5/8$	

Example candidate response – middle, continued	Examiner comments	
B Communicating the corporate objectives to the workfolice is a pacedure with equal importance as deciding on the objective itself, since the workfolice the all the ones that will pull the business towards its goals.  A large food retailer with many this shops can effectively communicate its objective through many way. Starting the objectives with thorough explanation of the starting the objectives with thorough explanation of the starting the caims in a newsletter to the workers is considered an effective way but it does not ensure that the worker would read it or understand it since feedback might not be received from the worker.  Allarging a conference for the workers or a meeting can be another method. This will ensure everyone got the message and immediate feedback will be present unfortunately, this method can be quite time consuming.  The managers of cach branch can also be informed of the objectives and then they would communicate it to their subjectives and then they would communicate it to their subjectives and then they would communicate it to their subjectives and then they would communicate it to the objectives and the will still be uncertainity if the message reached all workers but there will still be uncertainity if the message was transported right or was tamperated with, either intentionally or wintertionally. The corporate objectives can also be communicated to the entire workforce using SMS or emails This can be considered the cheapest method yet it does not contain immediate feedback.	<ul> <li>3 The candidate discusses four different methods and states both positives and negatives for each.</li> <li>4 Slight analysis.</li> <li>6 Slight evaluative comment.</li> <li>Mark for b = 7/12</li> <li>Total marks awarded = 12 out of 20</li> </ul>	

(a) This candidate gained Level 3 in the third paragraph, having shown some developed reasoning. However, there was not enough to raise the answer higher in the level.

To improve, the candidate could have given an example of a corporate objective that would be suitable for a large business and developed the answer specifically around that. For example, they could have used increasing the market share, to which they could have applied SMART, then gone on to analyse how and why this would motivate the workforce and be used to assess performance. This would have clearly established context and allowed development of reasoning.

**(b)** The candidate discussed four different methods and for each stated both positives and negatives. There was analysis in the second and fourth paragraphs, so Level 3 could be awarded here.

To improve, the candidate needed to show more analysis of the conference and SMS, developing both the positive and negative points with the use of analytical words such as *because*, *therefore*, etc. This would have gained the second mark in Level 3. To achieve Level 4, some reference to the best method in particular circumstances, or other evaluative comments from the mark scheme were required.

# Example candidate response - low

#### **Examiner comments**

- 1 Corporate objectives are understood and there is some explanation and application through the mention of retail shops ('smaller retailers') and comments about efficiency and motivation in business, therefore Level 2 can be awarded.
- 2 The reference to a large business is too vague to move this answer into Level 3; the candidate then bases their explanation on small retailers.

Mark for (a) = 4/8

3 The candidate shows understanding of internal business communication here. Although this is a short answer, it does identify communication methods in the context of retail shops (local store managers) and explores the notion of cascading of information. This approach demonstrates limited analysis with some application. Within Level 2 of the mark scheme, up to 4 marks can be awarded for application without analysis or for analysis without application. This answer has clear application, with some analysis in the final two sentences, therefore 5 marks are awarded.

Mark for (b) = 5/12

Total marks awarded = 9 out of 20

#### Paper 1 – Short answer and essay

#### How the candidate could have improved their answer

(a) This candidate clearly understood corporate objectives, and offered some explanation and application in discussing retail shops and including comments about efficiency and motivation in business. This was therefore a Level 2. The reference to a large business was too vague to move the answer into Level 3, and the candidate then based their explanation on small retailers.

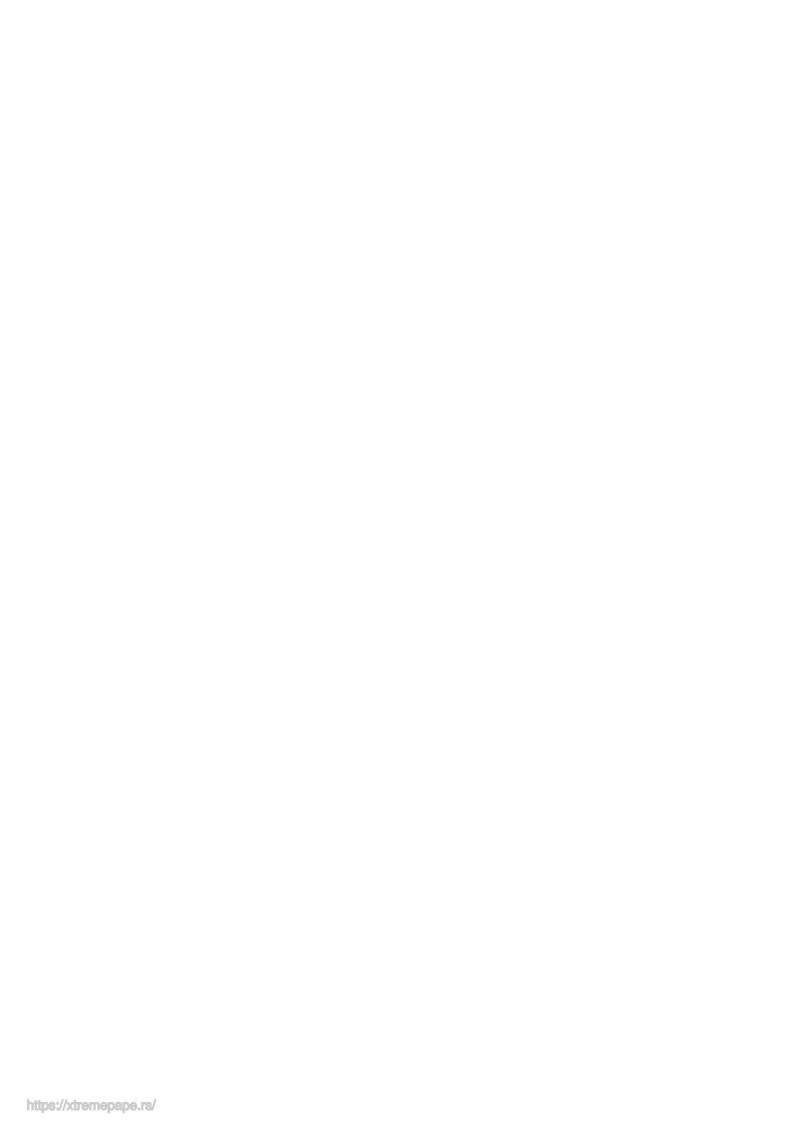

To improve, the candidate needed to focus more clearly on large retailers having many shops in different locations all under the same name. Here, the corporate objectives would apply to the entire group and its position in the market. This could then have been developed into discussing how each retail outlet would have objectives which helped to achieve the corporate objectives: making sure, for example, that every outlet was working effectively towards improving its own sales in order to achieve the corporate objective of increasing market share.

**(b)** The candidate showed understanding of internal business communication. Although this was a short answer, it did identify communication methods in the context of retail shops (local store managers) and explored the notion of cascading of information. This approach demonstrated limited analysis with some application. Within Level 2 of the mark scheme, up to 4 marks can be awarded for application without analysis or for analysis without application. This answer had clear application with some analysis in the final two sentences, therefore 5 marks were awarded.

To improve their analysis, the candidate needed to develop each point made, for example by explaining why communication is difficult. Analysis of the use of technology might have involved explaining its positives, e.g. speed, use of videos, and targeting individuals via email. To show evaluation, some of the negative aspects of technology use could have been explored, for example, its reliance on every worker having access to and reading emails.

# Common mistakes candidates made in this question

- (a) Developing an explanation of why objectives should be SMART, rather than focusing on the question asked.
- (b) Failing to put the answer in the context of a large food retailer with many shops limited some answers to Level 2.
