CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Level

MARK SCHEME for the October/November 2013 series

9691 COMPUTING

9691/33

Paper 3 (Written Paper), maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	Page 2	2	Mark Scheme	Syllabus	Paper				
			GCE A LEVEL – October/November 2013	9691	33				
1	(a) (i)	p q	+ 2 /		[1]

7 (a) (i)

(ii) Network (Interface) card

[1]

(b) (i) Copper wire/coaxial/twisted pair

Wire conducts electricity // changing current denotes different signals

Optic fibre cabling

Separate fibres used for separate signal

Data travels very fast

Signal transmitted as light pulses/travels at the speed of light

Radio/Microwave signals

Wireless communication // allows for mobile communication

Mark as 2 × 2

(ii) Maximum possible distance Speed of communication // data transfer rate [1]
