# INFORMATION TECHNOLOGY Paper 2 Practical MARK SCHEME Maximum Mark: 90 Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of 14 printed pages.

# Cambridge International AS & A Level – Mark Scheme PUBLISHED

## **Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

#### GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

#### **GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always whole marks (not half marks, or other fractions).

## **GENERIC MARKING PRINCIPLE 3:**

### Marks must be awarded positively:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit
  is given for valid answers which go beyond the scope of the syllabus and mark scheme,
  referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these
  features are specifically assessed by the question as indicated by the mark scheme. The
  meaning, however, should be unambiguous.

## **GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

#### **GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

#### GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Task	Answer	Marks
1	Tables Database contains cars table	1
	Database contains model table	1
	Database contains paint table	1
	Database contains drive table	1
	Database contains extras table	1
	No ID fields	1
	All tables have no repeated fields / duplicate data	1
	All tables have short meaningful field names	1
	Relationships Relationship model.Name to cars.Model	1
	1 to many	1
	with referential integrity set	1
	Relationship paint.P_code to cars.Colour	1
	1 to many	1
	with referential integrity set	1
	Relationship drive.D_code to cars.Drive	1
	1 to many	1
	with referential integrity set	1
	Relationship extras.E_code to cars.Extras	1
	1 to many	1
	Cars table Appropriate table name e.g. Car, Cars, Vehicles	1
	Appropriate fieldnames	1
	Reg_No as primary key	1
	Reg_No – 7 characters long	1
	Model field alphanumeric/text	1
	Model field 12 characters long	1
	Colour data type set to integer	1

Task	Answer	Marks
1	Drive field alphanumeric/text	1
	Drive field 1 character	1
	Extras field alphanumeric/text	1
	Extras field 3 characters	1
	Year data type restricted to integer	1
	At least 1 appropriate validation routine	1
	Drive table Table name – appropriate e.g. Engine	1
	Appropriate fieldnames	1
	D_Code as primary key & alphanumeric	1
	Drive field as alphanumeric/text	1
	Cost field as numeric/currency to 2dp	1
	One correct field length	1
	Extras table Table name – appropriate e.g. Extras	1
	Appropriate fieldnames	1
	E_Code as primary key & alphanumeric	1
	Extras field as alphanumeric/text	1
	Cost field as numeric/currency to 2dp	1
	One correct field length	1
	Model table Appropriate Table name e.g. Model	1
	Appropriate fieldnames	1
	Name/Model as primary key and alphanumeric	1
	Body Style field as alphanumeric/text	1
	Cost field as numeric/currency to 2dp	1
	One correct field length	1
	Paint table Table name – appropriate e.g. Colour/s	1
	Appropriate fieldnames	1
