Paper 3

9396/32

May/June 2023

2 hours 30 minutes

You must answer on the enclosed answer booklet.

You will need: Answer booklet (enclosed)

## INSTRUCTIONS

- Answer all questions.
- Follow the instructions on the front cover of the answer booklet. If you need additional answer paper, ask the invigilator for a continuation booklet.
- You may use a calculator.
- You should show all your working and use appropriate units.

#### INFORMATION

- The total mark for this paper is 90.
- The number of marks for each question or part question is shown in brackets [].

#### Answer **all** questions.

## Section A: Exercise and sport physiology

- 1 (a) Describe how endothermic reactions and exothermic reactions are used in the breakdown and resynthesis of ATP. [4]
  - (b) State the by-products of the aerobic energy system. [2]
  - (c) (i) Describe what is meant by the energy continuum. [2]
    - (ii) Identify **two** sporting activities or skills that are found at opposite ends of the energy continuum. [1]
    - (iii) Explain why one of the sporting activities or skills identified in (c)(ii) is found at the end of the energy continuum.
      [3]
  - (d) Overload is one of the principles of training.

Describe, using practical examples for each, three other named principles of training. [3]

- (e) Suggest physiological reasons why athletes should perform a cool down after an intense training session. [4]
- (f) Explain how the following factors affect an athlete's  $VO_2$  max:
  - age
  - sex
  - physiological make up.

[6]

(g) Describe long-term physiological adaptations to the muscular system that take place after a three-month period of aerobic training. [5]
