

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Advanced Subsidiary Level and Advanced Level

PSYCHOLOGY 9698/13

Paper 1 The Core Studies 1

May/June 2011
1 hour 30 minutes

Additional Materials: Answer Booklet/Paper

READ THESE INSTRUCTIONS FIRST

If you have been given an Answer Booklet, follow the instructions on the front cover of the Booklet.

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Section A

Answer all questions.

Section B

Answer any **one** question.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

Section A (60 marks)

Answer **all** questions in this section.

1	The study on eyewitness testimony by Loftus and Palmer looked at the effect of leading questions on estimations of speed.			
	(a) What is a leading question?	[2]		
	(b) What was the effect of leading questions on the estimations of speed?	[2]		
2	From the review by Deregowski on picture perception:			
	(a) Briefly describe the anecdotal evidence by Robert Laws.	[2]		
	(b) Suggest one problem with this anecdotal evidence.	[2]		
3	From the study by Baron-Cohen, Leslie and Frith on autism:			
	(a) Describe what was found when the different groups of children were asked the belief question	. [2]		
	(b) Suggest an explanation for these findings.	[2]		
4	From the study by Samuel and Bryant on conservation:			
	(a) Describe the sample of participants.	[2]		
	(b) Suggest two reasons why the participants in the study could not give informed consent.	[2]		
5	The study by Bandura, Ross and Ross on the imitation of aggression used a number experimental controls.	r of		
	(a) Identify two variables that were controlled.	[2]		
	(b) Why do psychologists want to control variables?	[2]		
6	Schachter and Singer conducted an experiment on emotion.			
	(a) What is an independent groups design?	[2]		
	(b) Suggest one reason why an independent groups design was used in this study.	[2]		
7	The study by Sperry on split brain patients involved a number of tests.			
	(a) Identify two different tests conducted by Sperry.	[2]		
	(b) Outline one finding that was common to all split brain patients.	[2]

Section B (40 marks)

Answer either Question 16 or Question 17 in this section.

16 Some studies in psychology gather both quantitative and qualitative data.

Choose any **one** of the studies from the list below and answer the questions which follow.

Schachter and Singer (emotion)
Hodges and Tizard (social relationships)
Dement and Kleitman (sleep and dreaming)

(a) Outline the procedure of your chosen study.

[10]

(b) Describe the quantitative and qualitative results of your chosen study.

[10]

- (c) Using your chosen study as an example, what are the strengths and weaknesses of qualitative data? [10]
- (d) Suggest a different way of gathering data for your chosen study and say what effect, if any, this would have on the results. [10]
- 17 A number of core studies use the case study method which collects detailed information about a participant.

Choose any **one** of the studies from the list below and answer the questions which follow.

Gardner and Gardner (project Washoe)

Freud (little Hans)

Thigpen and Cleckley (multiple personality disorder)

(a) Describe the main findings of your chosen study.

[10]

(b) Describe how the case study was carried out in your chosen study.

[10]

- (c) Using your chosen study as an example, what are the strengths and weaknesses of the case study method? [10]
- (d) Suggest how **one** other method could be used to investigate your chosen study and say how this would affect the results of the study. [10]
