Paper 1 Written MARK SCHEME

Maximum Mark: 100

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2016 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

This syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of **10** printed pages.

1 Tick whether the following statements are true or false.

	true (√)	false (√)
Tablet computers have touch screens.	✓	
Smartphones will only connect to the internet through Wi-Fi.		~
A tablet computer has a separate keyboard.		~
Smartphones use a touchpad.		~

4 correct answers – 2 marks 2 or 3 correct answers – 1 mark 0 or 1 correct answer – 0 marks

2 (a) Command line interface/CLI

(b) One from:

more difficult to edit entered commands need to know the commands Incorrect commands can affect the operation of the computer. Syntax needs to be exact for the program to work.

(c) Tick whether the following statements are true or false.

	true (√)	false (√)
A GUI involves the use of windows and menus.	\checkmark	
User interaction with a GUI is intuitive.	~	
A GUI takes up a lot of memory and resources.	✓	
Users have to learn a list of system commands in order to use a GUI.		✓

4 correct answers – 2 marks

2 or 3 correct answers – 1 mark

0 or 1 correct answer – 0 marks $\,$

The language/dialect used in checking the spelling/grammar could be different e.g. English/US)	9	Thr	ee from:		
דוב ומוועעמעכ/עומוכען עפבע זון עווכעאווע נווב פעלווווע/עומווווזמן גטעוט טפ טווופופוון פ ס. בחטווצוועיס)		The	language/dialect used in checking the spelling/grammar could be differ	ent e.a. Enc	llish(US)

Names/proper nouns might be highlighted as an error but are acceptable. If no suggestions are given Similar sounding words need to be checked, i.e. where, were, wear. The grammar might be too complex for the grammar checker to cope with. [3]

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – October/November 2016	0417	13

10 (a) Four from:

Agree the date and time of the conference

Either

Contact an audio conferencing providerfor organiser's PIN ...for participant's PIN Give the PIN to each participant at the start of the conference organiser types in his PIN Each participant dials the number and enters the PIN

or

the organiser phones/contact the first participant the organiser phones/contact subsequent participants puts them on hold... ...until all participants have been contacted

joins the participants together/joins the conference

[4]

(b) Four from:

It is needed for network security

It controls the incoming and outgoing network traffic.

A firewall establishes a barrier between a trusted, secure internal network and the Internet It logs incoming and outgoing traffic

It stops malicious traffic

It prevents computers connecting to unwanted sites

It prevents untrusted/unrecognised computers accessing data on the system

11 (a) Cloud is large groups of remote networked servers They allow centralised data storage

[2]

(b) Six from:

Disadvantages

Loss of control of the data...

...as the data is controlled by a data storage provider.

...the user needs to be able to trust the service provider and its staff.

...security issues with the storing of the data with the provider

...fire/flood/electricity spikes can affect data without the user knowing.

The data remains on the server for a length of time...

...easier to be hacked as more copies of it available...

...available for longer...

... users must use strong passwords/authentication methods as hackers have longer time to be able to crack the password...

...as several copies of the data are available

If data is not encrypted...

... can lead to security issues due to loss of control/hacking.

If connection is lost then the cloud cannot be accessed...

...data could be lost due to this.

If there is a mass/lot of data the data could be split over several servers...

...may have problems retrieving the data.

...may lead to security issues.

...data may be lost during the saving process.

Cost of using cloud is more expensive than buying a hard disk/SSD...

...most computers come with a hard disk/SSD

Difficult to delete all copies of a file...

...as the data is stored/backed up several times.

Advantages

The data is accessible anywhere...

...helps to migrate data from one device to another.

...helps to synchronise data.

Don't have to buy storage devices...

...some devices do not have hard disks/storage

...the cloud can be used for all storage requirements.

More storage space than using physical devices...

... the cloud has lots of storage

Don't have to manage the storage...

...the service provider manages the storage

... user does not have to worry about security measures as service provider secures data.

Allows many users to access the data...

...as the data is stored centrally.

Only pay for the storage you use...

...much of the space on the hard disk may be wasted.

[6]

A mark can be awarded for a reasoned conclusion.

If one side of the argument i.e. all advantages/disadvantages then 3 marks max.

If both sides have been addressed but without expansions/comparisons then 4 marks max.

	12 in a					
		wledge base es base				
	-	rence engine				
		ractive user interface	[3			
	inte		1.			
14	(2)	For example				
4	(a)	Video camera to inspect the finished product	[1			
		Light sensors used to detect position of the car	יי [1			
		Pressure sensor to make sure the car part is gripped correctly	[1			
	(b)	Three from:				
	(0)					
		Running costs are cheaper than paying humans a wage.				
		Robots can operate continuously.				
		Cars are built to a more consistent standard.				
		Robots are more accurate.				
		Can be used in hazardous conditions.				
		Greater productivity	[3			
	(c)	Three from:				
		If a abange is made in the manufacturing presses the relative pade to be represented				
		If a change is made in the manufacturing process the robot needs to be re-programmed. If a robot makes a mistake it will continue to make the same mistake.				
		Expensive to set up/maintain				
		Debate are not experient for a for forming tasks sutenemously without suideness from				

Robots are not capable of performing tasks autonomously without guidance from humans/they cannot think for themselves.

If they break down then they are difficult/impossible to repair.

If the robot breaks down the whole process stops.

The abilities of robots are suitable only for simple activities in which no major difficulties are met. [3]

		Cambridge IGCSE – October/November 2016	0417	13
18	One f	rom each section:		
	No liq Check Use R	rocution – for example: uids or drinks allowed near computers (insulation regularly CB (residual circuit breakers) te wires		[1]
	Have Don't Good	for example: a CO ₂ fire extinguisher cover equipment ventilation overload sockets		[1]
	Use c Use w	i ng over trailing leads – for example: able ducts/place cables under carpets/fasten cables to walls rireless devices ise cables		[1]
	Place Use la Use s	/ equipment falling – for example: devices in the middle of a table/not near the edge arge desks turdy desks sure wires are tucked out of the way to stop device being dragged off		[1]
19		marked as a level of response:		

Level 3 (7–8 marks):

Candidates will address both aspects of the question and discuss/consider different advantages/disadvantages. The issues raised will be justified. There will be a reasoned conclusion. The information will be relevant, clear, organised and presented in a structured and coherent format.

Level 2 (4-6 marks):

Candidates will address both aspects of the question and discuss/consider different advantages/disadvantages although development of some of the points will be limited to one side of the argument. There will be a conclusion. For the most part the information will be relevant and presented in a structured and coherent format.

Level 1 (1–3 marks): Candidates may only address one side of the argument, and give basic advantages and disadvantages. Answers may be simplistic with little or no relevance.

Level 0 (0 marks) Response with no valid content.
