MATHEMATICS 0580/22

Paper 2 (Extended) October/November 2009

1 hour 30 minutes

Candidates answer on the Question Paper.

Additional Materials: Electronic calculator Geometrical instruments

Mathematical tables (optional) Tracing paper (optional)

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 70.

This document consists of 12 printed pages.

For the diagram above write down

(a)	the order	of rotational	symmetry.
(\mathbf{u})	the order	or rotationar	symmetry,

Answer(a)	Γ1	1	ı
11.00 (00)	 L-	. л	

(b) the number of lines of symmetry.

2 Write down the next two prime numbers after 31.

3 Use your calculator to find the value of $\frac{(\cos 30^{\circ})^2 - (\sin 30^{\circ})^2}{2(\sin 120^{\circ})(\cos 120^{\circ})}$.

4 Simplify $\frac{5}{8}x^{\frac{3}{2}} \div \frac{1}{2}x^{-\frac{5}{2}}$.

In 1977 the population of China was 9.5 x 10⁸.
 In 2007 the population of China was 1.322 x 10⁹.
 Calculate the population in 2007 as a percentage of the population in 1977.

For Examiner's Use

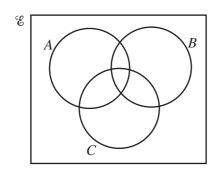

Answer	%[2]
21113 WC1	 /0[2]

 $\mathbf{A} = \begin{pmatrix} 0 & 1 \\ -4 & -12 \end{pmatrix} \quad \mathbf{B} = \begin{pmatrix} 3 & 4 \\ 0 & -4 \end{pmatrix}$

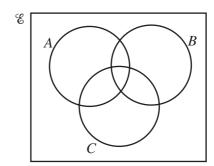

Calculate the value of $5 |\mathbf{A}| + |\mathbf{B}|$, where $|\mathbf{A}|$ and $|\mathbf{B}|$ are the determinants of \mathbf{A} and \mathbf{B} .

Answer [2]

7 Shade the region required in each Venn Diagram.

 $B' \cap (A \cap C)$

 $B' \cap (A \cup C)$

[2]

8	Find the length of the line joining the points $A(-2,$	10) unu D	(-8, 2).	
	Ans	swer AB =		[2]
9	Solve the simultaneous equations			
		8y = 57, $8y = -8.$		
	Ans	wer r =		
	Ans	wer x =		[2]
	Ans	swer x = y = y = y		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$. Find d when $v = 40$.	<i>y</i> =		[3]
10	The braking distance, d , of a car is directly proport When $d = 2$, $v = 5$. Find d when $v = 40$.	$y = \frac{1}{2}$	e square of its speed, v.	

For Examiner's Use

Each of the lengths 20 cm and 12 cm is measured correct to the nearest centimetre. Calculate the upper bound for the perimeter of the shape.

Answer		cm	[3]
--------	--	----	-----

12 Simplify $16 - 4(3x - 2)^2$.

Answer [3]

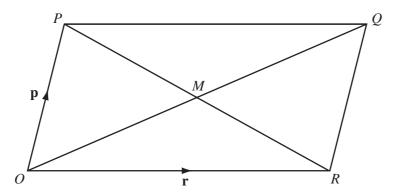

13	Solve the inequality	6(2-3x)-4(1-2x)	< 0
13	Solve the inequality	0(2-3x)-4(1-2x)	♥ U.

1 2002 11 024	Г21
Answei	 ردا

Zainab borrows \$249 from a bank to pay for a new bed.The bank charges compound interest at 1.7% per month.Calculate how much **interest** she owes at the end of 3 months.Give your answer correct to 2 decimal places.

Answer \$	 [3]

15

O is the origin and OPQR is a parallelogram whose diagonals intersect at M.

The vector \overrightarrow{OP} is represented by **p** and the vector \overrightarrow{OR} is represented by **r**.

(a) Write down a single vector which is represented by

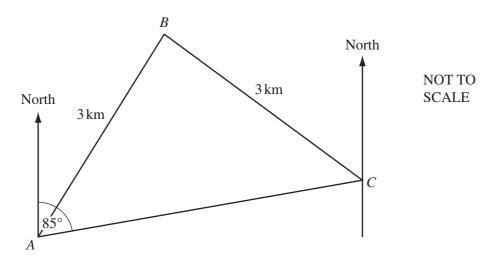

(i)
$$p + r$$
,

$$Answer(a)(i)$$
 [1]

(ii)
$$\frac{1}{2}$$
p - $\frac{1}{2}$ **r**.

$$Answer(a)(ii) \qquad [1]$$

(b) On the diagram, mark with a cross (x) and label with the letter S the point with position vector $\frac{1}{2}\mathbf{p} + \frac{3}{4}\mathbf{r}$. [2]

A, B and C are three places in a desert. Tom leaves A at 0640 and takes 30 minutes to walk directly to B, a distance of 3 kilometres. He then takes an hour to walk directly from B to C, also a distance of 3 kilometres.

	(a)	At what	time	did	Tom	arrive	at	C?
--	---	----	---------	------	-----	-----	--------	----	----

(b) Calculate his average speed for the whole journey.

(c) The bearing of C from A is 085° . Find the bearing of A from C.

17 (a) In 2007, a tourist changed 4000 Chinese Yuan into pounds (£) when the exchange rate was £1 = 15.2978 Chinese Yuan.

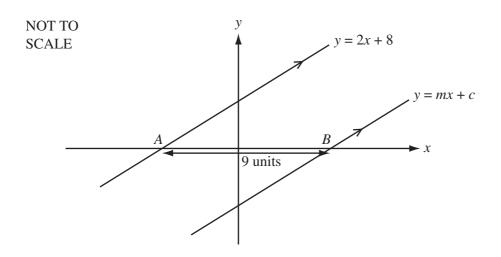

Calculate the amount he received, giving your answer correct to 2 decimal places.

$$Answer(a)$$
 £ [2]

(b) In 2006, the exchange rate was £1 = 15.9128 Chinese Yuan. Calculate the percentage decrease in the number of Chinese Yuan for each £1 from 2006 to 2007.

Answer(b) % [2]

For Examiner's Use

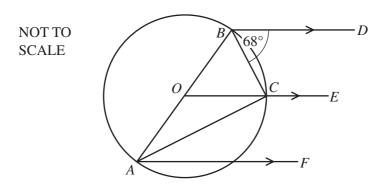

The line y = mx + c is parallel to the line y = 2x + 8. The distance AB is 9 units.

Find the value of m and the value of c.

Answer m = and c = [4]

For Examiner's Use

Points A, B and C lie on a circle, centre O, with diameter AB. BD, OCE and AF are parallel lines. Angle $CBD = 68^{\circ}$.

Calculate

(a) angle BOC,

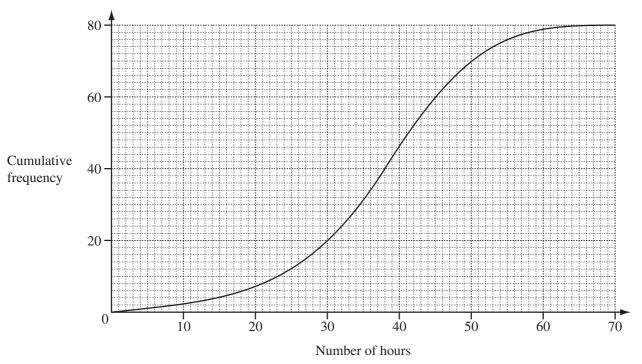

$$Answer(a)$$
 Angle $BOC =$ [2]

(b) angle ACE.

$$Answer(b) \text{ Angle } ACE =$$
 [2]

20 The number of hours that a group of 80 students spent using a computer in a week was recorded. The results are shown by the cumulative frequency curve.

For Examiner's Use

Use the cumulative frequency curve to find

(a)	the	median

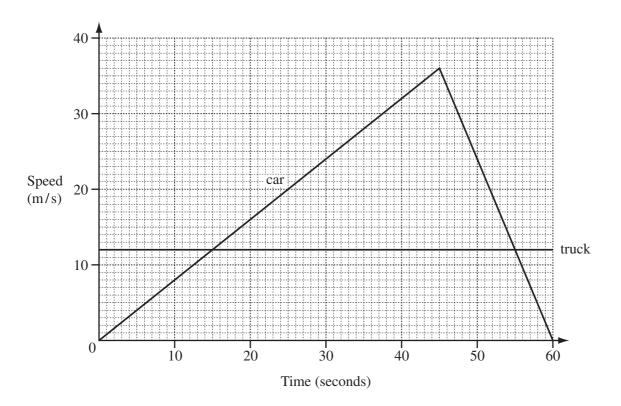

(b) the upper quartile,

(c) the interquartile range,

(d) the number of students who spent more than 50 hours using a computer in a week.

$$Answer(d) \qquad [2]$$

For Examiner's Use

The graph shows the speed of a truck and a car over 60 seconds.

(a) Calculate the acceleration of the car over the first 45 seconds.

Answer(a) m/s^2 [2]

(b) Calculate the distance travelled by the car while it was travelling faster than the truck.

Answer(b) m [3]

Question 22 is printed on the next page.

22
$$f(x) = 4x + 1$$
 $g(x) = x^3 + 1$ $h(x) = \frac{2x+1}{3}$

(a) Find the value of gf(0).

Answer(a) [2]

(b) Find fg(x). Simplify your answer.

Answer(b) [2]

(c) Find $h^{-1}(x)$.

 $Answer(c) \qquad [2]$
