# MARK SCHEME for the May/June 2012 question paper for the guidance of teachers 

## 0607 CAMBRIDGE INTERNATIONAL MATHEMATICS

0607/06
Paper 6 (Extended), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

\begin{tabular}{|c|c|c|c|c|}
\hline 5 \& \begin{tabular}{l}
\(\div 2\), square \\
OR \\
square, \(\div 4\) \\
Testing both shown
\end{tabular} \& 2

1 \& B1 square oe \& | correct order required |
| :--- |
| Accept $\left(\frac{n-1}{2}\right)^{2}$ or $\frac{(n-1)^{2}}{4}$ only if written here in correct form For B1 accept $n^{2}$ on its own OR these are square numbers |
| Correct operations only. Accept bad form. |
| Communication: any example written out correctly: $7-1=6 ; \frac{6}{2}=3 ; 3^{2}=9$ |
| OR $\quad \frac{7-1}{2}=3 ; \quad 3^{2}=9$ |
| OR $\left(\frac{7-1}{2}\right)^{2}=\left(\frac{6}{2}\right)^{2}=9$ |
| OR $\left(\frac{7-1}{2}\right)^{2}=3^{2}=9$ |
| OR $\frac{(7-1)^{2}}{4}=\frac{6^{2}}{4}=9$ |
| OR $\quad \frac{(7-1)^{2}}{4}=\frac{36}{4}=9$ | <br>
