Paper 5 Investigation (Core)

**October/November 2020**

**1 hour 10 minutes**

You must answer on the question paper.

No additional materials are needed.

## INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- You should use a graphic display calculator where appropriate.
- You may use tracing paper.
- You must show all necessary working clearly, including sketches, to gain full marks for correct methods.
- In this paper you will be awarded marks for providing full reasons, examples and steps in your working to communicate your mathematics clearly and precisely.

## INFORMATION

- The total mark for this paper is 36.
- The number of marks for each question or part question is shown in brackets [ ].

This document has **8** pages. Blank pages are indicated.

Answer **all** the questions.

### INVESTIGATION AREA OF RIGHT-ANGLED TRIANGLES

This investigation looks at finding the area of a right-angled triangle using its perimeter.

In this investigation all lengths are in centimetres.

$w$  is the hypotenuse of the triangle,  
 $b$  is the base of the triangle,  
 $h$  is the height of the triangle.

Perimeter,  $P$ , of this triangle.  $P = b + h + w$

Area,  $A$ , of this triangle.  $A = \frac{1}{2}bh$

1 (a)

This right-angled triangle is drawn on a  $1 \text{ cm}^2$  grid.

(i) Measure and write down the length of the hypotenuse.

..... [1]

(ii) Show that the perimeter is 12.

[1]

(iii) Find the area of the triangle.

..... [1]

(b)

NOT TO  
SCALE

(i) Find the perimeter of this triangle.

..... [2]

(ii) Find the area of this triangle.

..... [2]

(c)

Complete the table for right-angled triangles with sides  $b$ ,  $h$  and  $w$ .

$b$	$h$	$w$	Perimeter, $P$	Area, $A$
12	5	13	30	30
84	13	85		
24		25	56	84
60	11		132	

[5]

2 (a)

NOT TO  
SCALE

This triangle has perimeter  $P = 60$ .

Show that the calculation  $\frac{60}{2} \times \left(\frac{60}{2} - 26\right)$  gives the correct area for this triangle.

[3]

(b)

NOT TO  
SCALE

This triangle has perimeter  $P = 112$ .

Show that the calculation  $\frac{112}{2} \times \left(\frac{112}{2} - 50\right)$  gives the correct area for this triangle.

[3]

3 (a) Complete the table.

$b$	$h$	$w$	$P$	$A$	Calculation
24	10	26	60	120	$\frac{60}{2} \times \left(\frac{60}{2} - 26\right) = 120$
12	9	15	36	54	$\frac{36}{2} \times \left(\frac{36}{2} - 15\right) = 54$
48		50	112		$\frac{112}{2} \times \left(\frac{112}{2} - 50\right) =$
15	8	17		60	$= 60$
21		29	70	210	$=$
	12	37		210	$=$

[8]

(b) Write an expression for the area of a right-angled triangle in terms of  $P$  and  $w$ .

..... [1]

(c)

NOT TO  
SCALE

Use your expression from **part (b)** to find the area of this triangle.

..... [4]

**Question 4 is printed on the next page.**

4 (a)

NOT TO  
SCALE

This is a rhombus.

Use **Question 3(b)** to write down an expression for the area of this rhombus in terms of  $P$  and  $w$ .

..... [1]

(b) Use your expression from **part (a)** to find the area of this rhombus when  $w = 41$  and  $b = 40$ .

..... [4]
