## PHYSICS

Paper 4 Extended Theory
October/November 2019
MARK SCHEME
Maximum Mark: 80

## Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.
Cambridge International is publishing the mark schemes for the October/November 2019 series for most Cambridge IGCSE ${ }^{\text {TM }}$, Cambridge International A and AS Level components and some Cambridge O Level components.

## Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

## GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

## GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

## GENERIC MARKING PRINCIPLE 3 :

Marks must be awarded positively:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

## GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

## GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

## GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 1(a)(i) | $\begin{aligned} & a=\Delta v / \Delta t \text { or } a=(v-u) / t \text { in any form words, symbols or numbers or }(a=) \Delta v / \Delta t \text { or }(a=)(v-u) / t \text { or } 15(-0) / 5.0 \text { or }(a=) \\ & \text { gradient } \\ & 3.0 \mathrm{~m} / \mathrm{s}^{2} \end{aligned}$ | C1 A1 |
| 1(a)(ii) | $(F=) m a$ in any form words, symbols or numbers or $(F=) m a$ or $2300 \times 3.0$ 6900 N | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \end{aligned}$ |
| 1(b) | accelerating or speed/velocity increasing at a decreasing rate or acceleration decreasing gradient (of graph is positive and) decreasing | B1 <br> B1 <br> B1 |
| 1(c) | air resistance or friction mentioned or resistive force air resistance or friction or resistive force increases (with speed) | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \end{aligned}$ |

| Question | Answer | Marks |
| :---: | :--- | :---: |
| 2(a) | any two from: <br> shape <br> size/volume/length/density/any linear dimension <br> direction (of motion)/speed/velocity/momentum/kinetic energy/acceleration | B2 |
| 2(b)(i) | extension and tension/force/load mentioned <br> extension is directly proportional to tension/force/load | C1 <br> A1 |
| 2(b)(ii)1. | 260 N | B1 |
| 2(b)(ii)2. | $k=F / x$ in any form words, symbols or numbers or $(k=) F / x$ or $260 /(0.94-0.63)$ or $260 / 0.31$ <br> $840 \mathrm{~N} / \mathrm{m}$ | C1 <br> A1 |
| 2(b)(iii) | from chemical (potential energy) <br> to elastic (potential)/strain (at end) | B1 |

| Question | Answer | Marks |
| :---: | :--- | :--- |
| 3(a) | force $\times$ time (for which it acts) | B1 |
| 3(b)(i) | $v=I / m$ or $0.019 / 0.00011$ in any form words, symbols or numbers or $(v=) I / m$ <br> $170 \mathrm{~m} / \mathrm{s}$ | A1 |
| 3(b)(ii) | $K E=1 / 2 m v^{2}$ in any form words, symbols or numbers or $(K E=) 1 / 2 m v^{2}$ <br> $0.50 \times 0.00011 \times 170^{2}$ <br> 1.6 J or 1.7 J | C1 |
| 3(c) | C1 <br> accept reverse comments if clearly about how the molecular structure of a solid differs from that of a liquid <br> (molecules/they) have an irregular arrangement/not ordered/random arrangement <br> (molecules/they) are (slightly) further apart (on average) <br> (molecules/they are) not fixed in place | B1 |

| Question | Answer | Marks |
| :---: | :--- | :--- |
| $4(a)$ | it/cone vibrates <br> any two from: <br> alternating current (a.c.) (in coil/wire) or alternating magnetic field <br> (neighbouring) air vibrates or vibrations passed on <br> (producing) compressions and rarefactions/vibrations parallel to energy transfer <br> vibrating at 15000 Hz | B2 |
| $4(\mathrm{~b})$ | $\lambda=v / f$ in any form words, symbols or numbers or $(\lambda=) v / f$ or $330 / 15000$ <br> $0.022 m$ | C1 |
| 4(c) | at least two vertical wavefronts either to left of barrier or in gap <br> at least one wavefront showing some diffraction <br> approximately constant wavelength throughout and $\sim 50 \%$ of gap width |  |

| Question | Answer | Marks |
| :---: | :--- | :---: |
| 5(a) | four or more radial arrows/lines outside surface <br> at least one arrow pointing towards (centre of) sphere and none wrong | B1 <br> B1 |
| 5(b)(i) | positive charges on left and negative charges on right of S <br> equal numbers | A1 |
| 5(b)(ii) | B1Moves towards/attracted towards the negatively charged sphere/to the left | B1 |
| 5(b)(iii) | electrons/negative charges move (along the wire) towards Earth/towards ground/down the wire <br> S becomes positively charged | B1 |
| 5(c) | electrons mentioned <br> free (to move)/delocalised/mobile in metals/S or fixed in position in plastic/stand |  |

| Question | Answer |  |  | Marks |
| :---: | :---: | :---: | :---: | :---: |
| 6(a)(i) | $I=P / V$ or in any form words, symbols or numbers or $(I=) P / V$ or $9000 / 230$ 39A |  |  | C1 A1 |
| 6(a)(ii) | 40 A or any greater integer value (in A) up to and including 60 A |  |  | B1 |
| 6(b) | $E=P t$ or in any form words, symbols or numbers or $(E=)$ Pt or $9000 \times 1.0$ or $\underline{9000} \mathrm{~J}$ seen $35-16$ or $19\left({ }^{\circ} \mathrm{C}\right)$ seen <br> $m=E /(c \Delta T)$ or in any form words, symbols or numbers or $(m=) E /(c \Delta T)$ or $9000 /(4200 \times 19)$ 0.11 kg |  |  | C1 C1 C1 A1 |
| 6(c)(i) | two different metal wiresjoined at one end and voltmeter between free ends | or | three metal wires and two different joined ABA and voltmeter between free ends | B1 |
| 6(c)(ii) | any one from: <br> quick response/makes measurements fast measures rapidly varying temperatures electrical output small heat capacity robust/rugged |  |  | B1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 7(a) | $7 / 7.6 / 8 / 10$ marked towards top of $y$-axis and $1(.0)$ towards right of $x$-axis a straight line of positive gradient from 0,0 to point 1.0, 7.6 | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \end{aligned}$ |
| 7(b)(i) | energy (transferred) per unit charge <br> energy (transferred) from chemical or energy (transferred) to electrical or energy (transferred) around/in a (complete) circuit | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \end{aligned}$ |
| 7(b)(ii) | 1. $I=V / R$ or in any form words, symbols or numbers or $(I=) V / R$ or $12 / 7.6$ 1.6A | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \end{aligned}$ |
|  | 2. 4.2 V or 4.3 V | B1 |
|  | 3. $Q=$ It or in any form words, symbols or numbers or $(Q=)$ It or $1.6 \times 5.5 \times 60$ or $1.6 \times 5.5$ or 8.8 (C) 520 C or 530 C | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \end{aligned}$ |

| Question | Answer | Marks |
| :---: | :--- | :---: |
| 8(a)(i) | $n=\sin (i) / \sin (r)$ in any form words, symbols or numbers or $(n=) \sin (i) / \sin (r)$ or $\sin \left(53^{\circ}\right) / \sin \left(30^{\circ}\right)$ <br> 1.6 | C1 |
| 8(a)(ii) | path emerging into air along correct path (by eye) and labelled R | B1 |
| 8(a)(iii) | ratio/division of two identical quantities/speeds/sine functions/(pure) numbers | B1 |
| 8(b)(i) | path labelled $V$ with two correct refractions and below path of red light in glass |  |
| 8(b)(ii) | larger frequency results in smaller speed (in glass) or r.a. (reverse argument) or inversely related/proportional. <br> any two from: <br> more refraction/closer to normal/larger refractive index for larger frequency or r.a. <br> violet light has larger frequency or o.r.a. <br> violet light has a smaller speed (in glass) or o.r.a. <br> violet light has larger refractive index or o.r.a. | B1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 9(a)(i) | ${ }_{3}^{8}(\mathrm{Li})$ | B1 |
| 9(a)(ii) | $\begin{aligned} & 4 \times \mathbb{Q} \\ & 4 \times \bigcirc \end{aligned}$ <br> electron | B1 <br> B1 <br> B1 |
| 9(b)(i) | radioactive emission/ (background) radiation/decay is random | B1 |
| 9(b)(ii) | any one of: <br> rocks, buildings, soil, Earth, <br> space, cosmic rays, Sun, <br> radon, nuclear waste, weapons testing | B1 |
| 9(b)(iii) | $440-24$ or 416 or 52 or 55 or 79 or 3 (half-lives) or $45 / 15$ or $1 / 2^{3}$ or $1 / 8$ $1 / 2^{3}$ or $1 / 8$ or 52 or 55 or 79 76 (counts) | $\begin{aligned} & \text { C1 } \\ & \text { C1 } \\ & \text { A1 } \end{aligned}$ |
