UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

General Certificate of Education O Level

MARK SCHEME for the November 2004 question paper

5090 BIOLOGY

5090/02 Paper 2 (Theory), maximum mark 80

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

NOVEMBER 2004

GCE O Level

MARK SCHEME

MAXIMUM MARK: 80

SYLLABUS/COMPONENT: 5090/02

BIOLOGY Paper 2 (Theory)

Page 1		Syllabus	Ра	per
	O LEVEL – NOVEMBER 2004	5090	2	2
Section A				
1 (a) A -	<u>guard</u> cell		;	
В -	<u>epidermis/al</u> cell (R <u>lower</u> epidermis)		;	
C -	phloem/sieve tube (A companion)		;	3
(b) (i)	allows leaf to float AW/(maximum) exposure to light*		;	
	(R support unqualified)			
(ii)	diffusion/movement/collection/source/provides/gives AW	+ CO ₂		
	OR (maximum) exposure to light* (*once only)			
	(Ignore references to oxygen, but ${\bm R}~O_2$ references if they respiration)	refer to	;	2
	(R absorbs/takes in/references gas exchange)			
(c)	(Ignore references to leaf stalks and to spaces not interce	onnected)		
	stomata/guard cells (mainly) on upper surface AW		;	
	(or v.v.)			
	air spaces/chambers + palisade cells (or pos ⁿ described)	I	;	
	chloroplasts/chlorophyll in epidermis (R upper epidermis))	;	
	reference cells in clumps v. cells loosely packed AW/ air chambers v. intercellular spaces/			
	large spaces v. small spaces (R more/fewer spaces)		;	
	no cuticle on <u>lower</u> surface		;	
	reference quantity of chloroplasts/chlorophyll in spongy of		; max.	3
(d)	less/no + thickening/lignin/xylem/woody (or v.v.)		;	
	(R unqualified references to hard/rigid)			
	no need for support/support from water (or v.v.)		;	2
	(A floats on)			
		Т	otal 1	0

O LEVEL – NOVEMBER 2004 5090 I arge(r) diameter at low light intensity/or v.v. (A bigger/inversely proportional or description) (R proportional unqualified) fastest rate of change around 2 - 4 a.u./ slowest rate of change/levels off at 7 - 10 a.u. (b) reflex/autonomic/automatic/involuntary (R spinal/conditioned) (c) light sensitive/receptor (cells) or named/retina neurones/nerve cells or fibres (A optic nerve) impulses contraction + circular muscles (R if reference ciliary) relaxation + radial muscles (R if reference ciliary) correct reference iris max (d) no colour/pigment in iris/choroid (R eye) permits internal reflection AW of light/too much light enters eye/received by retina (A no shading/shielding/protection for retina) damage to retina/receptors/light-sensitive + cells/visual impairment AW (R damage to eyes) Total	2
