## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE O Level

## MARK SCHEME for the May/June 2006 question paper

## **5014 ENVIRONMENTAL MANAGEMENT**

5014/02

Paper 2, maximum raw mark 60

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the Report on the Examination.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2006 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

1	(a)	hot a	all year; many windy days; so evaporation rapid/speeded up/eq;	[3]
	(b)	-	carry out photosynthesis; which makes food/organic molecules for algae u/provide food for consumers;	to [ <b>2</b> ]
	(c)		gy lost /respiration loses energy; so only some food turned into consumer es/biomass; not enough to support more than two feeding levels; AVP;	[2]
	(d)	(ii)	sustainable, salt water never runs out; process is solar powered; no signific pollution; AVP; conservation, not many habitats for wading birds left; food chain can be maintain whilst evaporation goes on; AVP; [max	ned
2	(a)	cont	rol building; build sewage treatment works; AVP;	[2]
	(b)		any three valid points, such as leave no litter; do not kill fish; do not take coral away; report any damage; AVP;;	[3]
		(ii)	12;	[1]
			4 shore and dive only, 4 boat shore and dive only; 4 boat shore dive and snort AVP;	
	(c)		nearly all boat access have higher % damage; highest shore damage 3.1% is c just higher than lowest boat damage 3.0%;	only [ <b>2</b> ]
		(ii)	more dives in total, explained; anchors do damage; boats hitting shallow corals; AVP;;	[3]
		(iii)	3-10; need for repetition to make findings more reliable/ref to means;	[2]
	(d)		cannot be exactly repeated; survey of only one post not enough; no distant specified; no undamaged corals recorded; [max	
		(ii)	correct orientation; length; all three posts;	[3]
		(iii)	135, 150;	[1]
		(iv)	15/150 x 100 = 10 (%); allow error from part (iii)	[1]
	(e)	more	e damage/twice as much damage; around every post; AVP;	[2]
	(f)	num	bers of dives/divers at each survey;	[1]
	(g) some mention of all three aspects to score ma		e mention of all three aspects to score max 6 valid points;;;;;	[6]
3	(a)		eased number of leaves; but reduced length; shorter plants less exposed poration by wind; AVP;	to [3]
	(b)	(i)	8 m on scale;	[1]
		(ii)	east-west line drawn;	[1]
			orientation; axes labelled; plot leaves; plot length;	[4]
