Revision checklist for O Level Principles of Accounts 7110

How to use this guide

This revision guide describes what you need to know about your O Level Principles of Accounts examination.

It will help you plan your revision programme and will explain what the examiners are looking for in the answers to the questions. It can also help you to revise by using the tick boxes in Section 3 “What you need to know” to check what you know and which topic areas of the syllabus you have covered.

The guide contains the following sections:

Section 1: How will you be tested?

This section will give you information about the examination papers that you will take.

Section 2: What will be tested?

This section describes the areas of knowledge, understanding and skills that the examiners will test you on.

Section 3: What you need to know

This shows the syllabus content in a simple way so that you can check:
  - Which topics you need to know about
  - Details about each topic in the syllabus
  - How much of the syllabus you have covered
SECTION 1: HOW WILL YOU BE TESTED?

You will be assessed by taking two examination papers.

Both papers are compulsory.

On each paper all the questions are compulsory.

Questions from any section of the syllabus may appear on both the papers.

Paper 1
This lasts one hour and contains 30 multiple choice questions. These questions test your knowledge and understanding of the subject matter. They may also include some short numerical calculations.

This paper is worth 33.3% of the total marks for the examination.

Paper 2
This lasts two hours and contains between 4 and 6 questions. These questions include the preparation and understanding of accounting statements. They also include questions which involve answers in continuous prose or the completion of tables. One (usually the last question) involves the preparation of the financial statements of a manufacturing or trading business.

This question is usually worth 1/3 of the marks for the paper

This paper is worth 66.7% of the total marks for the examination.

Past examination papers
Past examination papers on the main CIE website – www.cie.org.uk. The main schemes are also available on the same site. These show exactly how the marks are awarded for each part of every question.

Syllabus
It is important that you follow the syllabus for the year in which you intend to sit the examination. The syllabus is available on the main CIE website – www.cie.org.uk.
SECTION 2: WHAT WILL BE TESTED?

2.1 Command (Key) words
Examiners use different command or key words in the questions to indicate which skill areas are being tested to help you understand what they are looking for in your answer. It is important that you understand the meaning of these command words so that you can demonstrate the skill areas needed, otherwise you may not gain high marks.

2.2 Skills areas
The syllabus sets out the skills that will be tested in the examination papers.

There are three skill areas which will be assessed. You will develop these skill areas during your lessons and the examination will test the progress you have made. Your teacher will be able to give you more information about each skill area is tested in the different examination papers.

The following table shows you the range of skills you should develop.

<table>
<thead>
<tr>
<th>Skill</th>
<th>Skill area</th>
<th>You need to be able to demonstrate this skill</th>
</tr>
</thead>
</table>
| A     | Knowledge with understanding      | To explain facts, terms, principles and techniques related to bookkeeping and accounting  
To apply knowledge and information to various accounting situations and problems  
Command words to test this skill area are: State, define, identify, record, calculate, explain |
| B     | Analysis                          | To select, order and analyse information in written and numerical format.  
To present numerical information in standard accounting format  
Command words to test this skill area are: Select, prepare, draw up |
| C     | Evaluation                        | To interpret and evaluation accounting information that may be provided to you, or produced by you in a previous answer.  
You may be asked to draw up conclusions, describe possible actions and make recommendations.  
Command words to test this skill area are: Explain, suggest, advise, discuss, comment on, compare |
2.3 Number of marks
You need to pay attention to the number of marks available. This will provide you with a guide as to how much time you should spend on answering the question and how long a “written” answer should be.

For example, if a question asks “State two examples of ...............” for 2 marks then you need to give only two examples and you do not need to explain anything.

However, if a question says “Explain what if meant by .................” for 3 marks then you need more that one simple statement.
If a question says “Advise the trader on how he could improve .................” for 6 marks then you need to write a longer paragraph outlining your recommendations.

The number of lines provided on the question paper may also give you a guide on the length of the answer expected (though remember that you will not necessarily require all the lines provided.)
SECTION 3: WHAT YOU NEED TO KNOW

This section covers the 6 themes which are detailed in the syllabus. They are:

1. Basic principles
2. Accounting procedures
3. Financial statements
4. Preparation of financial statements
5. Payroll accounting
6. Advanced principles

Each theme covers a number of topics. There can be up to 9 topic areas within one theme.

The following pages are in the form of a table which lists the topics you may be tested on in the examination papers.

The table does not cover every topic area in detail, but is designed to make sure you revise the key areas and become aware of how a topic can be tested on either of the papers.

You can use the table throughout your course to check the topic areas you have covered. You can also use it as a revision aid. When you think you have a good knowledge of a topic you can tick the appropriate box in the checklist column. The main headings in the topic areas are usually followed by details of what you should know. You can test yourself –

- Cover up the details in the table with a sheet of paper
- Try to remember the details
- When you have remembered the details correctly, put a tick in the appropriate box on the table

If you use a pencil to tick the boxes, you can re-test yourself whenever you want by simply rubbing out the ticks. If you are using the table as a check-list of which topics you have covered, you can put a tick in the topic column next to the appropriate syllabus reference.

The column headed “Comments” can be used
- To add further information about the details for each syllabus section
- To provide examples
- To highlight areas of difficulty/things which you need to ask your teacher about

<td>1.5</td>
<td>The cash book</td>
<td>The cash book contains the cash account and the bank account. There may also be columns for discount allowed and received. Cash discount is a deduction from an invoice for paying by a set time. You need to know how to make entries in a cash book. There are different types of bank account – current and deposit accounts. You need to understand the difference between a loan and an overdraft and how these are recorded in the accounting records. At regular intervals the bank balance in the cash book should be reconciled with the balance shown on the bank statement. You need to know the causes of this difference and how to update the cash book and prepare a bank reconciliation statement.</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>1.6</td>
<td>The general journal</td>
<td>This is used to record entries which are not recorded in any or the other books of prime entry such as correction of errors, opening entries, purchase and sale of non-current assets. A journal entry has three parts – the name of the account to be debited, the name of the account to be credited and a narrative. You need to be able to prepare journal entries.</td>

|       | 2.3   | You need to know how to make ledger and journal entries for the disposal of a non-current asset.  
*Endorsed textbook Chapter 12*  
*Endorsed workbook Q61-64*  
*Examination questions J09 P1 Q17, No8 P1 Q13, N08 P1 Q14 J10 P21 Q2, N09 P2 Q2, J08 P2 Q2* |            |          |

**Correction of errors**

Some errors will not affect the balancing of a trial balance (See 1.8)  
Other errors do affect the balancing of a trial balance. If a trial balance fails to balance the difference is recorded in a suspense account.  
When errors are discovered they are corrected by journal entries.  
When all the errors have been discovered the suspense account will close automatically.  
You need to be able to use a suspense account and to correct errors by means of a journal entry.  
Some errors may affect the calculation of the profit for the year and items within a balance sheet.  
You need to be able to prepare a statement of corrected profit and revised balance sheet extracts.

<tbody>
<tr>
<td></td>
<td>At the end of the financial year a partnership needs to prepare an appropriation account to show how the profit is shared out. You need to be able to prepare an appropriation account to include interest on capital and drawings, partners’ salaries and profit shares. Partners usually maintain a capital and a current account in the ledger for each partner. You need to be able to prepare partners’ ledger accounts. You need to be able to show how these accounts will appear in the balance sheet of a partnership. Sometimes two sole traders amalgamate to form a partnership. You need to be able to record such an amalgamation. <em>Endorsed textbook Chapter 19-20</em> <em>Endorsed workbook Q98-106</em> <em>Examination questions J10 P11 Q20, J10 P11 Q21, N09 P1 Q21 J10 P22 Q3, N09 P2 Q5, J09 P2 Q4, N07 P2 Q5, J07 P2 Q4</em></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Clubs and societies

A club is a non-trading organisation whose main aim is to provide some facilities and services for its members. The main source of income for a club is subscriptions from members. You need to be able to prepare a subscriptions account. You need to be able to prepare the year-end accounts for a club. These are a receipts and payments account (which is a summary of the cash book), an income and expenditure account (which is similar to an income statement) and a balance sheet. Sometimes the trading account section of an income statement is also required if there is any trading activity such as a club shop.

4.4

**You should be able to:**

A club does not have capital. Instead the surpluses (profits) accumulate within the club to form the accumulated fund.

*Endorsed textbook Chapter 18*

*Endorsed workbook Q92-97*

*Examination questions J10 P11 Q22, J10 P11 Q23, N09 P1 Q22 J09 P2 Q3, N08 P2 Q3, J06 P2 Q2*

**From incomplete records**

Some businesses do not maintain a full set of accounting records. Where the only records relate to assets and liabilities at the start and end of the year an opening and closing statement of affairs is prepared. Profit can be calculated by comparing the opening and closing capital (adjusted for any drawings and capital introduced).

You need to be able to prepare a statement of affairs and calculate the profit for the year.

Where there is a record of money received and paid, it may be possible to calculate the sales and purchases and produce a full set of financial statements.

You need to be able to calculate sales and purchases and prepare the financial statements.

When dealing with incomplete records it is sometimes necessary to use percentages to calculate missing information.

You need to be familiar with the techniques of mark-up, margin and rate of inventory turnover.

|       | 6.2   | You will need to be able to compute and explain the following ratios  
Rate of inventory turnover  
Gross profit/sales  
Net profit/sales  
Net profit/capital employed (ROCE)  
Working capital (current) ratio  
Quick ratio (acid test) ratio  
You will also need to be able to explain the relationship between gross and net profits to the valuation of the stock, rate of inventory turnover, turnover, expenses and capital (equity).  
The importance of the valuation of inventory and the effect of an incorrect valuation on gross profit, net profit, equity and asset valuation must be recognised.  
*Endorsed textbook Chapter 24  
Endorsed workbook Q121-126  
Examination questions J10 P11 Q28, N09 P1 Q27, N09 P1 Q28  
J10 P21 Q4, J10 P22 Q4, Specimen P2 Q4, N09 P2 Q4
